Solid carbide drill

- Reinforced geometry for reliable machining
- Excellent tool life thanks to carefully selected carbide (ultra-fine grain quality)
- Good self-centering capability
- Optimal chip breaking, even at greater drilling depths
- High concentricity
- Precise hole quality

Solid carbide drill

- Reinforced geometry for reliable machining
- Excellent tool life thanks to carefully selected carbide (ultra-fine grain quality)
- Good self-centering capability
- Optimal chip breaking, even at greater drilling depths
- Very wide application range, even under non-ideal conditions
- High concentricity
- Precise hole quality
- With twisted coolant channels

Countersinks, 90°

- F3 different convex cutting edges
- Low-vibration cutting processes
- For round and chatter-free countersinking
- Considerably lower feed force required
- For universal application

4ETM

4 Flutes Multi-functional Thread Mills for Multi Purpose (L Rotation)

- Thread mills for Hardened steels (up to HRC 40), pre-hardened steels, alloy steels, carbon steels, cast irons
- With one 4ETM tool, it's available for drilling, threading and chamfering all together
- Pre-drilling for tapping is no longer needed
- It can also be used on blocked holes, penetrating holes, and sloping curved surfaces as multi-function tool
- If the diameter of hole is longer than 2D without pre-drilled hole, use the tool with coolant for the better chip emission
- It can be used for heli coil threading
- The main direction of tool rotation is left-handed (M4) and the direction of threading is right-handed

4HTMS

4 Flutes Helix Thread Mills for Stainless Steels

- Thread Mills for SUS, Titanium alloys
- Coolant type of helix flutes for deep threading
- With multiple flutes composition, it shortens threading time
- Maximum drilling depth: 3*D2 (Threading diameter)
- It can be used for heli coil threading
- Both right and left threading are available
