Respiratory Protection

3M™ Respiratory Protection Solutions

Disposable Respirators

Disposable respirators are an excellent choice for workplaces where cleaning and maintenance is not practical.

Constructed from advanced materials, including 3M™ Advanced Electret Filter Media, 3M™ Disposable Respirators are designed for comfort and protection, allowing your team to give their best.

Reusable Respirators

Reusable respirators can help to reduce cost and waste* in workplaces where regular cleaning and maintenance is possible.

Designed to be easy-to-use and utilising comfortable, durable materials, 3M™ Reusable Respirators will help to give your team confidence in their protection.

Powered and Supplied Air Respirators

Powered and supplied air respirators can integrate head, eye, face, hearing and respiratory protection, while keeping your team comfortable for long periods.

Designed to be adaptable for different conditions, 3M™ Powered and Supplied Air Respirators will help to protect your team in demanding environments.

*Compared to daily usage and disposal of disposable respirators, when the reusable respirator is properly maintained.

	Disposable Respirators 	Reusable Respirators 	Powered and Supplied Air Respirators 
Can provide protection from particulate hazards (e.g. dust, mists, metal fumes)	✓	✓	✓
Can provide protection from gas and vapour hazards (e.g. solvents)	✗	✓	✓
Requires cleaning and maintenance	✗	✓ ¹	✓
Options for wearers who have facial hair	✗	✗	✓
Options for companies who prefer not to face-fit test ²	✗	✗	✓ ²

1. Maintenance-free options are available. For example the 3M™ Maintenance Free Reusable Respirator 4000+ Series.

2. Face-fit testing is a legal requirement in some countries, and is always 3M recommended best-practice, for tight-fitting respirators.

Respiratory Protection

Disposable Respirators

Focus

3M™ Aura Particulate Respirators 9300+Gen3

3M™ Aura™ Particulate Respirator 9300+Gen3 Series is the third generation of the best-selling 3M™ Aura™ flat fold respirator.

- Original 3-panel, flat-fold design fits a wide range of face shapes and sizes
- 3M™ Cool Flow™ Comfort Valve allows a greater percentage of warm, exhaled air to escape, helping to increase your comfort. *compared to 3M™ Aura™ 9300+ equivalent model
- 3M™ Advanced Electret (filter) Media helps you breathe easier

Product ID	Part Number	Product Name	MOQ	OU
7100134313	9322+GEN3	3M™ Aura™ Particulate Respirator, FFP2, Valved, 9322+Gen3	120	Each
7100134314	9332+GEN3	3M™ Aura™ Particulate Respirator, FFP3, Valved, 9332+Gen3	120	Each

Focus

3M™ Aura™ Particulate Respirators 9300+ Series

3M™ Aura™ Particulate Respirators 9300+ Series has an ergonomic, flat-fold, 3-panel design featuring a low breathing resistance filter media. Available in FFP1, FFP2 and FFP3 protection levels, and with valved and unvalved models, our respirators feature an innovative chin tab for easy adjustments and an embossed, sculpted upper panel to help reduce eyewear fogging.

- Product contains recycled content: 3M™ Aura™ Particulate Respirators 9312+, 9322+ and 9332+ contain at least 25 % recycled content*
- Packaging contains recycled content: At least 30% recycled content in individual product wrap, 100% recycled content in primary carton and 76% recycled content in shipper case*
- *Claims apply to products produced since 01/04/2024. Product: 3M™ Aura™ Particulate Respirators 9312+, 9322+ and 9332+ contain at least 25 % pre-consumer recycled content. Percentage recycled content varies by model. Figure stated is the lowest percentage of recycled content for the three protection levels. Percentage recycled content calculated in accordance with EN ISO 14021:2016+A1:2021. Packaging: At least 30% recycled content in individual product wrap – Aura™ 9310+, 9312+, 9320+, 9322+, 9330+, 9332+, 1872V+ and 1873V+ only. 100% recycled content in primary carton, 76% recycled content in shipper case. Please note, due to infrequent shortages in recycled material supply, we may temporarily use virgin material to maintain product supply and quality.

Respiratory Protection

3M™ Particulate Respirators 8000 Series

The 3M™ Particulate Respirator 8000 Series is our range of cup-shaped respirators with a twin-strap design. They provide FFP1, FFP2 and FFP3 respiratory protection, with a convex shape, and either a nose foam and adjustable nose clip, or a face seal that helps you get a comfortable fit across a broad range of face sizes.

- Robust, cup-shaped respirators
- FFP1 (NPF 4), FFP2 (NPF 12) and FFP3 (NPF 50) protection against dusts and mists
- Features a durable, collapse-resistant inner shell

Product ID	Part Number	Product Name	MOQ	OU

Focus

3M™ VFlex™ Particulate Respirators 9100 Series

3M™ VFlex™ Particulate Respirators provide economic protection and have a compliant V-shaped pleat design with a proprietary 3M filter material that helps make breathing easier. Our respirators feature an embedded, adjustable metal nose clip for a custom fit and side tabs for easier positioning on your face. The flat-fold design makes storage easy and they're available in two sizes.

- Economic respirator solution
- V-shaped pleats flex and expand around your mouth for unrestricted comfort
- Proprietary 3M filter material helps you breathe easier

Respiratory Protection

3M™ Speciality Particulate Respirators 9900 Series

3M™ Speciality Particulate Respirators provide lightweight and comfortable FFP1, FFP2 and FFP3 breathing protection against organic vapours, acid gases, ozone, hydrogen fluoride, and nuisance odours. Our respirators have an activated carbon layer that provides relief against nuisance-level odours. The convex shape, soft inner face seal, nose clip and twin strapping helps adjust to a broad range of faces, and the braided, colour-coded headbands help you quickly identify their protection level.

- Provides FFP1 (NPF 4), FFP2 (NPF 12), and FFP3 (NPF 50) protection against dusts and mists
- Activated carbon layer helps guard against nuisance odours and, in some models, low levels of organic vapours, acid gases and ozone (NPF 10)
- Convex shape, nose clip and twin strapping helps provide a comfortable fit across a broad range of face shapes

Respiratory Protection

Half Mask Respirators

Focus

3M™ Reusable Half Mask Respirator 4000+ Series

3M™ Maintenance Free Reusable Respirators 4000+ Series are a range of simple and ready-to-use half masks with integrated filters. An enhanced valve assembly helps to reduce exhalation breathing resistance, and the close-fitting, non-silicone, textured face seal is soft and comfortable to wear. Packaged in a resealable bag for hygienic storage and transportation.

- An enhanced valve assembly helps to reduce exhalation breathing resistance for improved breathing comfort
- Lightweight, well-balanced design
- Integrated filters mean it's ready to use and maintenance free

Focus

3M™ Secure Click™ Reusable Half Mask Respirator HF-800 Series

Invented, not imitated, 3M Secure Click Half Facepiece Reusable Respirators offer many innovative features that are designed to meet the demands of today's workforce. When used with approved 3M™ Secure Click™ Filters, they help protect against particulates and/or a wide variety of gases and vapours. Intuitive, comfortable and reliable. Available in 3 sizes to help fit a wide range of faces.

- Say It: Speaking Diaphragm is designed to help provide easy communication
- Hear It: Secure Click connection helps provide confidence that filters/cartridges are installed properly. Simply align the connections and push until you hear a click
- Check It: Easy, one-touch seal check helps increase worker confidence that the respirator is being worn properly

Full Face Respirators

Focus

3M™ Secure Click™ Reusable Full Face Respirators

The 3M™ Secure Click™ Reusable Full Face Mask FF-800 Series helps protect against particulates and/or a wide variety of gases and vapours when used with approved 3M™ Secure Click™ filters. This facepiece comes with exciting features that make it 3M's next generation in comfort, breathability and simplicity.

- The quick, easy, one-touch positive pressure push button seal check helps provide improved confidence in respirator fit
- Two dual-flow gas & vapour filters on each respirator combine to create the world's first quad flow gas & vapour filter system with four airflow paths providing easy breathing and comfort
- Large lens for excellent field of vision, scratch resistant lens coating

Warning:
This guide is only an outline. It should not be used as the only means for selecting a respirator. Details regarding performance and limitations are set out on the respirator package and user instructions. Before using any of these respirators, the wearer must read and understand the user instructions for each product. Specific country legislation must be observed.

* excluding Formaldehyde

** for occurrence of Isocyanates, please contact the 3M Customer Helpline +44 (0) 870 60 800 60 or your local 3M office

What types of filters are there?

Filter Type	Colour	Main area of application
P	White	Solid and liquid particles
A	Brown	Organic gases and vapours with boiling point >65°C.
AX	Brown	Highly volatile organic solvents with boiling point <65°C.
B	Grey	Inorganic gases
E	Yellow	Acid Gases
K	Green	Ammonia and organic ammonia derivatives
Hg	Red	Mercury (vapour) and mercury compounds

Filter Classification	APF with 3M Half Mask	APF with 3M Full Face Mask
P1	4	4
P2	10	10
P3	20	40
Class 1 Gas and Vapour filters	10 or 1000ppm (whichever is lower)	20 or 1000ppm (whichever is lower)
Class 2 Gas and Vapour filters	10 or 5000ppm (whichever is lower)	20 or 5000ppm (whichever is lower)

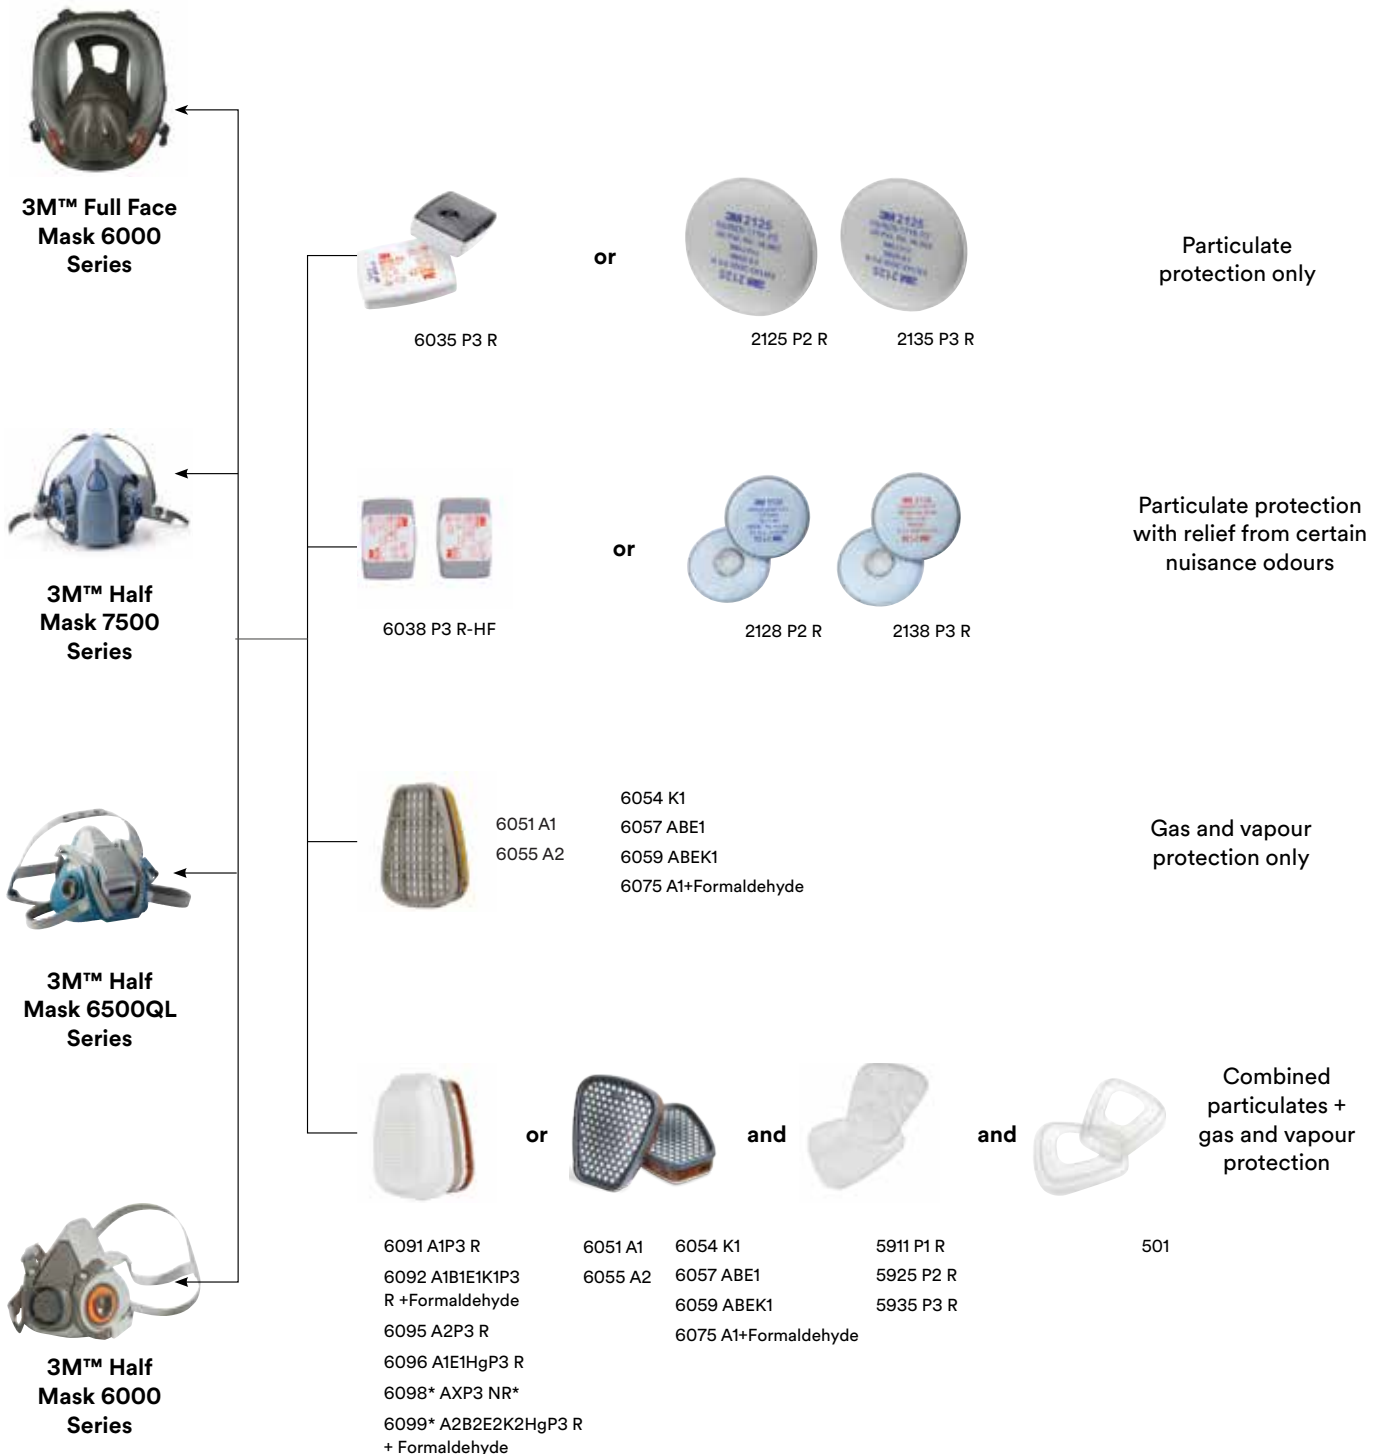

AX-Filter for low boiling point (organic composition with a low boiling point under 65 °C). AX-Filter should only be fitted to 3M™ Full Face masks. AX filters may only be used for a single shift.
A1 and A2 Filter for organic vapour with a boiling point above 65 °C.

APF = Assigned Protection Factor (For further information on APFs see HSE document HSG53)

Select the right respirator and filter.

Respiratory Protection

Cartridges & Filters

3M™ Secure Click™ Gas, Vapour and Particulate Filters

Experience the breathability and comfort of 3M™ Secure Click™ Gas, Vapour and Particulate Filters. They help provide convenient respiratory protection against a range of gases, vapours and particulates depending upon the model selected. 3M™ Secure Click™ Gas, Vapour and Particulate Filters utilise dual-flow technology for easy breathing. The Secure Click™ connection style provides confidence that the filters are installed properly. They are CE approved for use with 3M™ Secure Click™ Reusable Respirators HF-800 Series and FF-800 Series. Compatibility and approvals between filters and facepiece depends on regulations. Please refer to the Technical Datasheet to ensure filter and facepiece are approved.

- CE approved for use against a range of gases, vapours and particulates depending upon the model selected. Compatibility and approvals between filters and facepiece depends on regulations. Please refer to the Technical Datasheet to ensure filter and facepiece are approved
- Hear it: Quick, simple cartridge connection. Simply align the connections and push until you hear a click. Use with CE approved 3M™ Secure Click™ Facepieces
- Feel it: Experience the breathability and comfort provided by the world's first quad-flow gas and vapor cartridge system

Respiratory Protection

3M™ Secure Click™ Particulate Prefilters

3M™ Secure Click™ Particulate Prefilters can be attached to 3M™ Secure Click™ Dual-flow Gas & Vapour Filters D8000 Series to provide particulate protection from certain solid and liquid particles when used with 3M™ Secure Click™ Reusable Respirators. Use the 3M™ Secure Click™ Filter Retainer D701 to attach two pre-filters to each filter.

- CE-approved particulate filter for respiratory protection against particulates
- Use with 3M™ Secure Click™ Cartridges D8000 Series
- Allow for replacement of particulate filters prior to change out of gas & vapour filters for cost savings

Respiratory Protection

3M™ Bayonet Particulate Filters

3M™ Bayonet Particulate Filters are CE approved and conveniently provide protection against a wide range of dusts, mists and other particulates depending on the model selected. Compatibility and approvals between filters and facepiece depends on regulations. Please refer to the Technical Datasheet to ensure filter and facepiece are approved. They have a bayonet-style connection that fits any 3M™ Bayonet Reusable Respirator offering low breathing resistance and good balance with a slim, swept back profile, designed to optimise your field of vision when wearing the respirator.

- CE approved for environments containing particulates. Compatibility and approvals between filters and facepiece depends on regulations. Please refer to the Technical Datasheet to ensure filter and facepiece are approved
- Bayonet-style connection fits a wide range of compatible half and full facepiece 3M™ Reusable Respirators
- Filters can help reduce inhalation exposures to a wide range of dusts, mists and other particles, including certain airborne biological particles

Respirator Fit Testing

3M™ Training and Fit Testing Kit

Test kits and accessories designed to help your organisation meet regulatory fit testing requirements for tight fitting respirators. The kits can be used to validate face to respirator seal on any disposable respirator or half mask respirator. Not suitable for fit testing full facepiece respirators - this must be through Quantitative face fit testing.

- Fit test kits and accessories can be used to check respirator fit
- FT-10 uses a test solution of sodium saccharin that produces a sweet tasting aerosol
- FT-30 uses a test solution of denatonium benzoate to produce a bitter tasting aerosol

Product ID	Part Number	Product Name	MOQ	OU
7000002042	FT30	3M™ Fit Test Kit, Qualitative, Bitter, FT-30	1	Each
7000001898	FT10	3M™ Fit Test Kit, Qualitative, Sweet, FT-10	1	Each

3M™ Test Hood FT-14

The 3M™ Fit Test Hood FT-14 is used with 3M™ Qualitative Fit Test Apparatus Kit FT-10 Sweet and FT-30 Bitter as the test environment.

- A replacement part for 3M™ Qualitative Fit Test Apparatus Kits FT-10 Sweet and FT-30 Bitter
- Used with the 3M™ Qualitative Fit Test Apparatus FT-10, FT-30 and the 3M™ Training and Fit Testing Case FT-20
- Can be used to check face-to-respirator seal on any particulate respirator or gas/vapor respirator with a particulate prefilter

Product ID	Part Number	Product Name	MOQ	OU
7000051788	FT-14	3M™ Test Hood, FT-14	10	Each

3M™ Fit Test Collars

The 3M™ Fit Test Collar FT-15 is used with 3M™ Qualitative Fit Test Apparatus Kit FT-10 Sweet and FT-30 Bitter as the test environment.

- Collar for fit testing; to be used in conjunction with 3M™ Test Hood FT-14
- Used with the 3M™ Qualitative Fit Test Apparatus FT-10, FT-30 and 3M™ Training and Fit Testing Case FT-20
- Can be used to validate face-to-respirator seal on any disposable respirator or half mask respirator

Product ID	Part Number	Product Name	MOQ	OU
7000051789	FT15	3M™ Fit Test Collar, FT-15	1	Each

Respiratory Protection

3M™ Nebulizer FT-13

Replacement nebulizer used with the 3M™ Qualitative Fit Test Apparatus FT 10, FT 30 and the 3M™ Training and Fit Testing Case FT 20.

- A replacement part for 3M™ Qualitative Fit Test Apparatus Kits FT-10 Sweet and FT-30 Bitter
- Fast, easy method for performing qualitative fit testing
- Used with the 3M™ Qualitative Fit Test Apparatus FT-10, FT-30 and the 3M™ Training and Fit Testing Case FT-20

Product ID	Part Number	Product Name	MOQ	OU
7000001897	FT13	3M™ Nebulizer, FT-13	3	Each

3M™ Fit Test Solution

Replacement fit test solutions for use with 3M™ Qualitative Fit Test Apparatus Kits FT-10 (Sweet) and FT-30 (Bitter). The choice between the bitter and sweet test kit is a personal one, however a small percentage of the population are unable to detect saccharin in which case the bitter test must be used.

- Sweet or bitter taste fit test solutions for fit testing
- 3M™ Fit Test Solution, Sweet, FT-12 uses a test solution of sodium saccharin that produces a sweet tasting aerosol
- 3M™ Fit Test Solution, Bitter, FT-32 uses a test solution of denatonium benzoate to produce a bitter aerosol

Product ID	Part Number	Product Name	MOQ	OU
7100004634	FT32	3M™ Fit Test Solution, Bitter, 55ml, FT-32	6	Each
7100335089	FT12	3M™ Fit Test Solution, Sweet, 55ml, FT-12	6	Each

3M™ Sensitivity Solution

3M™ Sensitivity Solutions are used to test the sensitivity of the respirator wearer to a sweet or bitter solution. For use with 3M™ Qualitative Fit Test Apparatus Kits FT-10 (Sweet) and FT-30 (Bitter)

- Sweet or bitter taste sensitivity solutions for fit testing
- 3M™ Sensitivity Solution, Sweet, FT-11 uses a test solution of sodium saccharin that produces a sweet tasting aerosol
- 3M™ Sensitivity Solution, Bitter, 55ml, FT-31 uses a test solution of denatonium benzoate to produce a very bitter taste

Product ID	Part Number	Product Name	MOQ	OU
7100004635	FT31	3M™ Sensitivity Solution, Bitter, 55ml, FT-31	6	Each
7000029587	FT11	3M™ Sensitivity Solution, Sweet, 55ml, FT-11	6	Each

Respiratory Protection

3M™ Secure Click™ Quantitative Fit Test Adapter Kits

3M™ Secure Click™ Quantitative Fit Test Adaptor Kits are for conducting quantitative fit testing on 3M™ Secure Click™ Reusable Respirators. Filters are not included.

- Use to conduct quantitative fit testing on 3M™ Secure Click™ Reusable Respirators with speaking diaphragm
- Includes head harness assembly
- Not for use with 3M™ Secure Click™ Respirators without Speaking Diaphragm - for these respirators manually probe the respirator

Product ID	Part Number	Product Name	MOQ	OU
7100181558	HF-800-03	3M™ Secure Click™ Quantitative Fit Test Adapter Kit, for 3M™ Secure Click™ Half Mask HF-800 Series, HF-800-03	1	Each
7100265593	FF-800-06	3M™ Secure Click™ Quantitative Fit Test Adapter, FF-800-06	1	Each

3M™ Fit Test Adapters

For an alternative method to sharing a probed fit testing respirator, use 3M™ Quantitative Fit Test Adapters. Our fit test adaptor kits allow you to fit test with a personal 3M™ Respirator, rather than using a shared probed fit test respirator.

- Adapter allows fit testing with an individual's personal 3M™ Respirator
- Alternative to sharing a probed fit testing respirator
- Quick and easy to fit

Product ID	Part Number	Product Name	MOQ	OU
7000001945	601	3M™ Fit Test Adapter, Quantitative, 601	1	Each

Respiratory Protection

Reusable Respirator Parts & Accessories

3M™ Reusable Respirator Overspray Guards

3M™ Overspray Guard 400+ is available to help prolong the life of the main particulate filter for the 3M™ Maintenance-Free Reusable Respirators. Traps larger spray particles before they reach and clog the filters.

- 3M™ Overspray Guard 400+ prolongs respirator service life by reducing clogging of the particulate filters during paint spray applications
- Keeps filters clean during paint spray applications
- Traps larger spray particles before they reach and clog the filters

Product ID	Part Number	Product Name	MOQ	OU
7100113104	400+	3M™ Reusable Respirator Overspray Guard for 3M™ Maintenance-Free Reusable Half Mask 4000+ Series, 400+	500	Each

3M™ Reusable Respirator Face Shield & Lens Covers

3M™ Reusable Respirator Face Shield & Lens Covers is our range of covers designed to extend the service life of 3M™ Reusable Respirator lenses.

- Designed for use with 3M™ Reusable Respirators
- Helps to extend the service life of the mask when in use and when in storage
- Spare or replacement part

Product ID	Part Number	Product Name	MOQ	OU
7100188168	6800	3M™ Reusable Respirator Full Facepiece Faceshield Cover for 3M™ Reusable Full Face Mask 6000 Series, 6800	100	Each

3M™ Secure Click™ Reusable Respirator Filter Retainers

3M™ Secure Click™ Reusable Respirator Filter Retainers enable users to add particulate protection to existing 3M™ Secure Click™ Gas & Vapour filters for use in a wider range of applications. For use with 3M™ Secure Click™ Particulate Filters 7000 Series, 3M™ Reusable Respirator Filter Retainers enable users to easily combine their protection for use with a wide range of gas, vapour and particulate hazards, or a combination of these.

- Easily combine 3M™ Secure Click™ Gas & Vapour filters with 3M™ Secure Click™ Particulate Filters D7000 Series
- Connects the 3M™ Secure Click™ Particulate Filters 7000 Series to the 3M™ Secure Click™ Gas & Vapour Filters
- Specially designed for 3M™ Secure Click™ Reusable Respirators

7100066103	501	3M™ Reusable Respirator Filter Retainer, 501	20	Each

3M™ Reusable Respirator Filter Adapters

3M™ Reusable Respirator Filter Adapters enable users to adapt or combine certain 3M™ Bayonet Filters for use in a wider range of applications.

- Easily adapt or combine certain 3M™ Bayonet Filters
- Connects the filter to the respirator
- Specially designed for 3M™ Reusable Respirators

Product ID	Part Number	Product Name	MOQ	OU
7100066105	502	3M™ Reusable Respirator Filter Adapter, 502	64	Each
7100066104	3M603	3M™ Reusable Respirator Filter Adapter, 603	16	Each

3M™ Reusable Respirator Cleaning Wipes

3M™ Reusable Respirator Cleaning Wipes are foil-wrapped wipes for cleaning mask face seals. Our wipes can be used with all 3M half and full-face masks.

- Face seal cleaner for reusable masks
- Individually foil wrapped
- Help increase the effective service life of your equipment

3M™ Versaflo™ TR-800 Powered Air Systems

Whether you're mixing and granulating compounds in a pharmaceutical facility or working with combustible gases in the oil and gas industry, the 3M™ Versaflo™ TR-800 Powered Air Respirator is essential.* Available in assemblies or ready-to-use kits with everything your team needs to get started. *The 3M™ Versaflo™ Powered Air Respirator TR-800 with 3M™ Versaflo™ Battery TR-830 attached, is ATEX approved for use in certain potentially explosive atmospheres. It is approved to Zone 0 requirements and so may be suitable for areas where potentially explosive atmospheres are expected and permanent in normal operations.

- Compatible with particulate only filters or particulate and gas and vapour combination filters for protection in a variety of environments
- Audible and visual alarms alert users to low battery and low air flow
- Battery includes a bumper to help absorb impact; mechanical attachment of the battery helps prevent removal during use

Focus

3M™ Powered Air Respirator System PF-600E+ Series

3M™ Powered Air Respirator System PF-600E+ Series is a durable powered air respirator system designed for heavy duty environments at an affordable price.

- Durable and economical powered air respirator system
- Compatible with the 3M™ DT Series filters and specific 3M™ Versaflo™ headtops
- Automatic monitoring feature checks that the unit is operating as designed, warns the user of low battery and compensates for changes in filter resistance (i.e. as the filter loads with particulate)

Focus

3M™ Powered Air Respirator System PF-600-ASB Series

3M™ Powered Air Respirator System PF-600-ASB Series is a durable powered air respirator system, designed for heavy duty environments including Asbestos applications.

- Powered Air Respirator designed for Asbestos Removal applications
- PF-602E-ASB turbo is also approved with loose fitting 3M™Versaflo™ M-200 and M-300 range of helmets
- Compatible with the 3M™ DT Series filters (Please note that the PF-602E-ASB when used with FF-600 Full facepiece is approved only with 3M™ Particulate Filter PF10 P3 R SL DT-1135E)

Respiratory Protection

Supplied Air Respirator Systems

3M™ V-Series Supplied Air Regulator Valves & Assemblies

3M™ V-Series Supplied Air Regulators provide comfortable, cost effective respiratory protection for all-day use.

- Low maintenance - no filters or batteries to maintain
- Certain 3M™ supplied air valves can cool or heat air by up to 28°C
- All V-Series Supplied Air Regulators require an approved 3M™ compressed air supply tube, couplings, breathing tube and headtop to complete the CE-approved respirator system

Product ID	Part Number	Product Name	MOQ	OU

3M™ Supplied Air Respirator Systems S200+ Series

3M™ Versaflo™ S-200+ Supplied Air System is our supplied air system which provides respiratory protection against particles, gases and vapours, and combination hazards when used with an approved 3M face mask.

- For use with 3M™ Full Facepiece Respirator 6000 Series and 3M™ Half Face Mask 7500 Series
- Provides protection against particles like fine dusts, aerosols, paint spray or metal fume; gases and vapours; and combined hazards
- System provides constant flow of air across the face for maximum user comfort

Emergency Escape Respirators

3M™ Scott™ ELSA Emergency Life Support Apparatus

The 3M™ Scott™ ELSA (Emergency Life Support Apparatus) is an escape breathing apparatus which provides a constant supply of air for rapid escape from hazardous industrial and marine environments.

- Breathing apparatus provides a constant supply of air for quick escape from hazardous industrial and marine environments
- Automatic quick-fire activation triggered by opening the carrying bag
- Cubic hood design with large visor area and ori-nasal mask for reduced carbon dioxide dead space

Product ID	Part Number	Product Name	MOQ	OU
7100322252	1047372	3M™ Scott™ ELSA Emergency Life Support Apparatus, 15 min, Standard Bag, Full, 1047372		

Respiratory Protection

Supplied Air Respirators

3M™ Scott™ Flite COV

The 3M™ Scott™ Flite COV (Change Over Valve) is a positive pressure supplied air respirator that also provides emergency respiratory protection and escape capability, packaged in a convenient kit including Flite COV, Cylinder and Facemask. This allows the user to enter hazardous atmospheres including those identified as Immediately Dangerous to Life or Health (IDLH).

- Positive pressure supplied air respirator that also provides emergency respiratory protection and escape capability
- Allows user to enter IDLH (Immediately Dangerous to Life and Health) environments
- If air flow from primary supply gets cut off, apparatus automatically switches to emergency cylinder air supply
- Warning whistle alerts user that apparatus has switched to cylinder air
- Packaged in a convenient kit comprising SCBA, Cylinder and Facemask
- Simple to operate and maintain

3M™ Scott™ Flite COV

Product ID	Part Number	Product	MOQ	OU
7100330231	2034779	3M™ Scott™ Flite COV Kit consisting of Flite COV, Vision 3 facemask, 15 minute Cylinder, Charged, 2034779	1	Each

Self-Contained Breathing Apparatus (SCBA)

3M™ Scott™ Propak Sigma SCBA

3M™ Scott™ ProPak Sigma Kits are a Type 2 open-circuit self-contained compressed-air breathing apparatus with an unpadded carrying harness, packaged in a convenient kit including SCBA, Cylinder and Facemask.

- Compliance set for marine, industrial or firefighting environments
- Cost-effective solution with minimal padding and rigid back frame construction
- Tempest demand valve features low breathing resistance, first-breath automatic activation and hands-free bypass
- Packaged in a convenient kit comprising SCBA, Cylinder and Vision Facemask

3M™ Scott™ Propak Sigma SCBA

Product ID	Part Number	Product Name	MOQ	OU
7100330230	2034778	3M™ Scott™ Propak Sigma Kit incl SCBA, Vision 3 Facemask, 45 min Cylinder, Steel, 300 Bar, Charged, 2034778	1	Each
7100325667	2018927	3M™ Scott™ 1640 Series Cylinders, Steel, 300 Bar, with Right Angle Valve (RA), Full, 2018927	1	Each

3M™ Scott™ ProPak-i SCBA

The 3M™ Scott™ ProPak-i is a Type 2 open-circuit self-contained compressed-air breathing apparatus with a padded lower harness.

- Suitable for a variety of environments including industrial, marine, oil and gas and firefighting applications
- Rigid back frame construction with padded lower harness for comfort
- Tempest demand valve features low breathing resistance, first-breath automatic activation and hands-free bypass
- Packaged in a convenient kit comprising SCBA, Cylinder, Vision Facemask and case.

3M™ Scott™ ProPak-i SCBA

Product ID	Part Number	Product Name	MOQ	OU
7100332523	2034777	3M™ Scott™ Propak-I Kit incl SCBA, Vision 3 Facemask, 45 min Cylinder, Composite, 300 Bar, Charged, 2034777	1	Each
7100332844	2034781	3M™ Scott™ CYL-FWC-1860-RA-NLL, Composite, 300 Bar, 45 Min Cylinder Charged, 2034781	1	Each

3M™ Scott™ ProPak-f SCBA

The 3M™ Scott™ ProPak-f is a Type 2 open-circuit self-contained compressed-air breathing apparatus with padded upper and lower harness.

- Designed for use by the professional SCBA users, fire service or as a firefighting set in the oil and gas or industrial markets
- Rigid back frame construction with padded upper and lower harness for improved comfort
- Tempest demand valve features low breathing resistance, first-breath automatic activation and hands-free bypass
- Packaged in a convenient kit comprising SCBA, Cylinder, Vision Facemask and case.

Respiratory Protection

Positive Pressure Facemasks

3M™ Scott™ Vision 3 Positive Pressure Face Mask

3M™ Scott™ Vision 3 positive-pressure face masks feature a liquid silicone rubber outer mask with reflex seal and TPE ori-nasal inner mask. Used with a 3M™ Scott™ breathing apparatus, they are suitable to provide respiratory protection in Immediately Dangerous to Life or Health (IDLH) environments.

- Positive-pressure face masks with a liquid silicone rubber outer mask with reflex seal and TPE ori-nasal inner mask
- Designed for use with the entire range of 3M™ Scott™ breathing apparatus
- Multicurvature polycarbonate visor provides excellent panoramic vision
- Allows the user to wear integrated spectacle frames without compromising the face mask seal.

3M™ Scott™ Vision 3 Positive Pressure Face Mask

Product ID	Part Number	Product Name	MOQ	OU
7100317326	1071671	3M™ Scott™ Vision 3 Positive Pressure Facemask, Standard Rubber Head Harness, M/L, 1071671	1	Each

3M™ Scott™ Promask Positive Pressure Face Mask

3M™ Scott™ Promask positive-pressure face masks feature a Procomp (bromobutyl/EPDM) outer mask with reflex seal and TPE ori-nasal inner mask. Used with 3M Scott breathing apparatus, they're suitable to provide respiratory protection in Immediately Dangerous to Life or Health (IDLH) environments.

- Positive-pressure face masks with Procomp (bromobutyl/EPDM) outer mask with reflex seal and TPE ori-nasal inner mask
- Designed for use with the entire range of 3M™ Scott™ breathing apparatus
- Single-curvature polycarbonate visor provides excellent panoramic vision
- Allows the user to wear integrated spectacle frames without compromising the face mask seal.

Hearing Protection

40 million workers are exposed to loud noise and 13 million suffer from hearing disorders despite industry regulations*. You can advance your hearing conservation programme with a customised and comprehensive approach to the hearing protection challenge. Implementing a solution that really makes a difference begins with understanding the hazards, the regulation and the factors that impact protection.

The real world concerns of hearing protection

Variable Noise Levels: Every environment is different and workers can face a wide range of sound levels throughout the day and in different areas at the same facility.

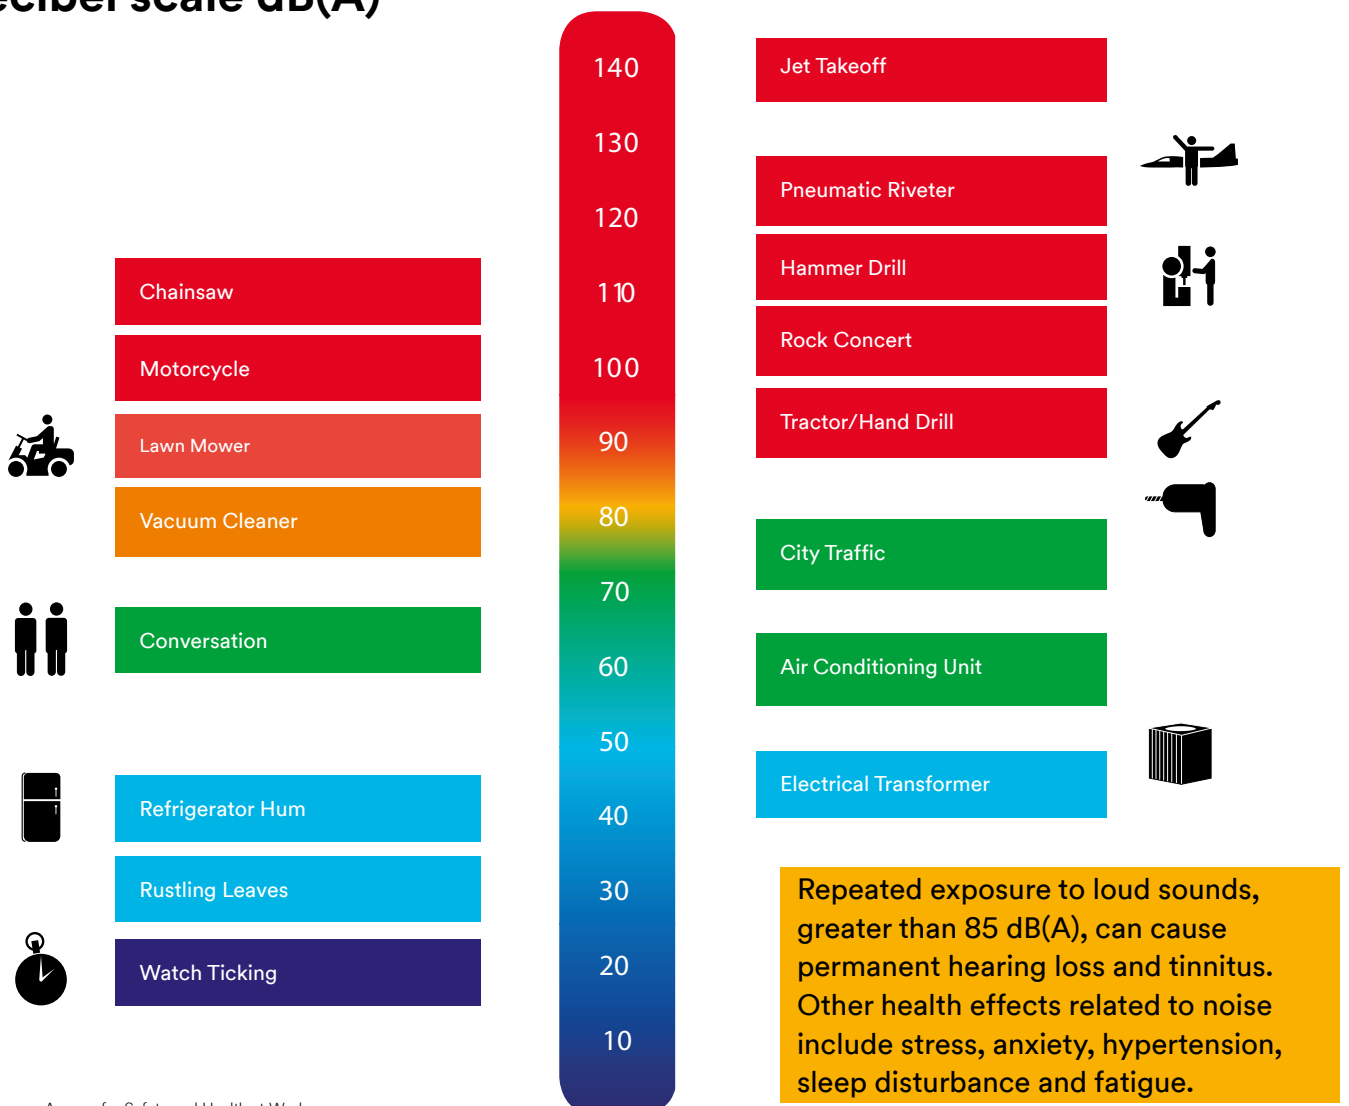

The Human Factor: Each person has a different shape, size and anatomy of the ear canal, so there is no one-size fits all hearing protection solution. The key to achieving optimal protection is having the best fit possible.

Employee Communication: Where there is an essential need for workers to communicate or hear warning sounds it is vital that their hearing is protected from hazardous noise levels.

What types of sounds require hearing protection?

At home and work, it's important to understand which sounds may cause hearing loss and require hearing protection:

Decibel scale dB(A)

* Source: European Agency for Safety and Health at Work

Ear fit validation

How do you decide what hearing protection you will offer to your workers?

If you are simply using the SNR found on the hearing protection packaging as a guide you may not be providing accurate protection levels for every worker. Ears come in many shapes and sizes and to make sure all workers are getting the protection they need, you need to know their Personal Attenuation Rating (PAR).

Noise-induced hearing loss is 100% preventable.

Why 3M?

As the leader in hearing protection, 3M offers a complete solution, with dual-ear and earmuff testing capabilities plus a user-friendly interface. The 3M™ E-A-Rfit™ Dual-Ear Validation System is the fast and easy way to find your employees' PAR, because we know how important it is to make your hearing conservation program fit seamlessly into your operation.

Learn more: 3M.co.uk/Earfit

What's your PAR?

Every employee is different.
Every job is different.
Every ear is different.

Finding each employee's PAR will help you have assurance that workers' hearing is protected and they are compliant with the law. That's why we made the new 3M™ E-A-Rfit Dual-Ear Validation System fast, accurate and easy.

Fit testing is key

Get results you can trust. The 3M™ E-A-Rfit™ Dual-Ear Validation System measures the effectiveness of the earplug or earmuff inside the employee's ear providing accurate, quantitative results. Because you can simultaneously test both ears, you have more to focus on education including the importance of fit and protection.

1 Fit

Have the employee insert their hearing protection.

2 Test

Connect to microphones and begin speaker test sound.

3 Assess

Use PAR to customise hearing protector selection.

Did you know that 40% of employees incorrectly select or use hearing protection?*

What should you consider when choosing your hearing protection?

Some key factors include the level of attenuation and protection required, also considering if situational awareness and communication are necessary. Compatibility with other PPE is important in terms of comfort and ergonomics, but perhaps more importantly combinations of earmuffs and carriers must be tested and certified against PPE Regulation 2016/425 (EU).

3M believes in the importance of compatibility.

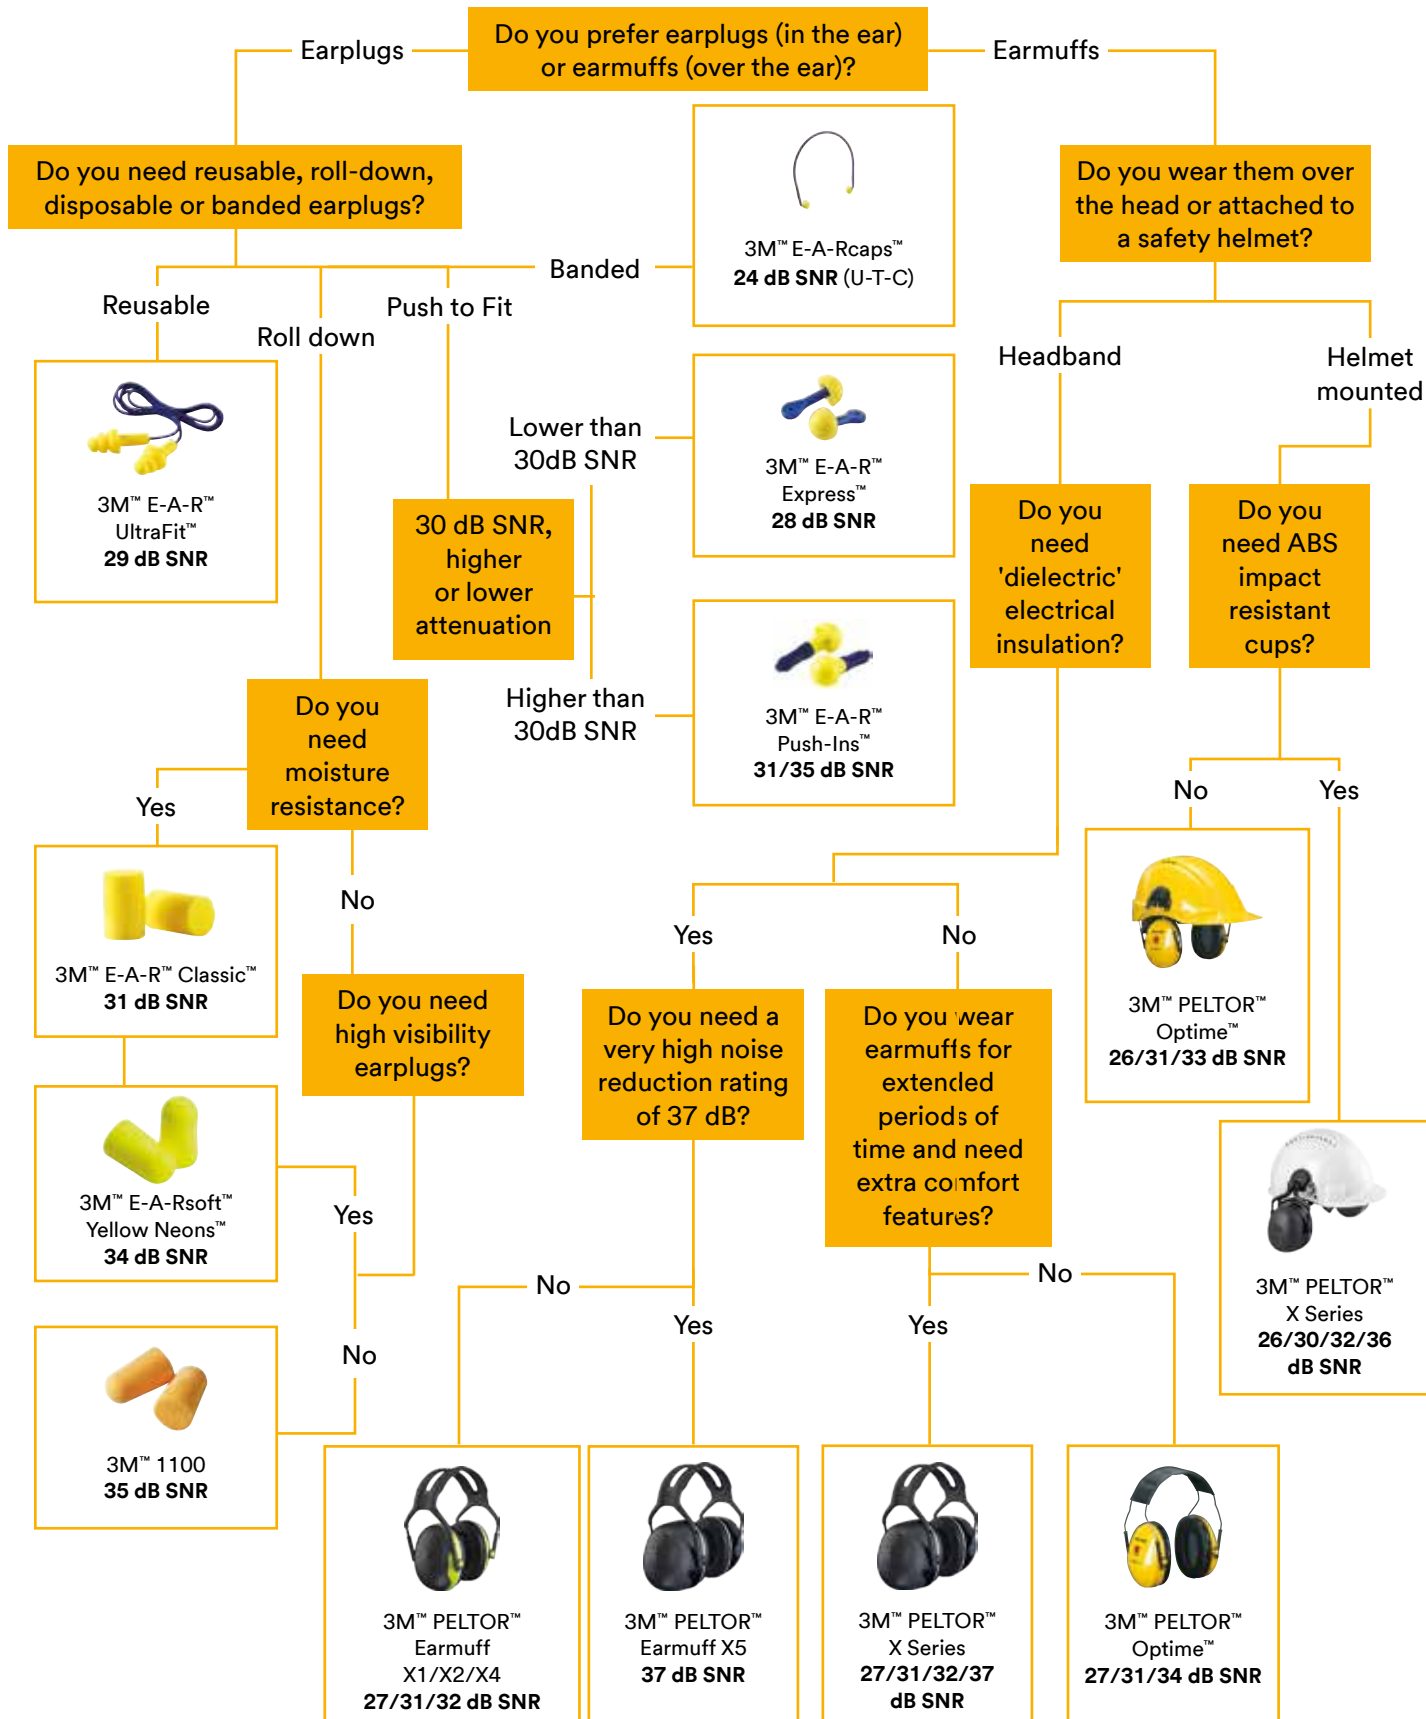

We can help you understand the requirements of EN 352:2020 Part 3 and how it supports your selection of safe and approved combinations of earmuffs and carriers like safety helmets.

Hearing protection use and care

Roll down earplugs

How to use

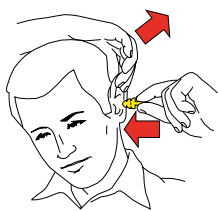

Slowly roll and compress foam earplugs into a very thin cylinder. While compressed, insert the earplug well into the ear canal. Fitting is easier if you reach around the head to pull the ear outward and upward during insertion.

Care and cleaning

Keep the earplugs clean and free from material that can irritate the ear canal. Wipe dirt and debris from earplugs with a clean cloth between uses. Discard the earplugs if they noticeably change their firmness or do not re-expand to their original size and shape.

Reusable pre moulded earplugs

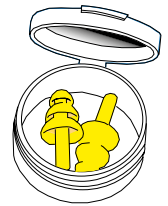

How to use

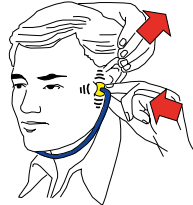

Reach around the back of your head and pull outward on the ear while inserting the plug until you feel it sealing. This may seem tight at first, especially if you have never worn earplugs.

Care and cleaning

Pre-moulded earplugs could last several months depending on the type and on your work environment, hygiene and body chemistry. They should be replaced if they shrink, harden, tear, crack or become permanently deformed. Wash them in warm soapy water and rinse well. When dry, store them in a carrying case.

Banded earplugs

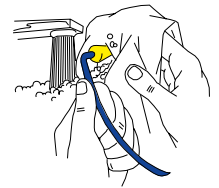

How to use

Hold the large ends of the pods and swivel them to direct the tips into the ear canal openings. Firmly push and wiggle the pods into the ear canal until a snug seal is obtained. Pulling on the outer ear while pushing the pods will be helpful to most wearers.

Care and cleaning

Most semi-aural hearing protectors can be cleaned in the same way as pre-moulded earplugs. Since the band holds the tips in place to provide an acoustic seal, do not tamper with it otherwise the protection afforded by the device may be reduced.

Earmuffs

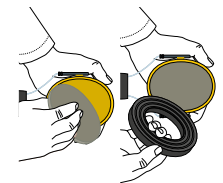

How to use

Earmuffs must fully enclose the ears to seal against the head. Adjust the headband so cushions exert even pressure around the ears to get the best noise reduction. Pull hair back and out from beneath the cushions. Do not wear caps, store pencils behind the ear or anything that may break the seal.

Care and cleaning

Cushions can be cleaned with warm soapy water and rinsed thoroughly. Do not use alcohol or solvents. Cushions normally need replacing at least twice a year or more – whenever they become stiff, cracked, or do not seal. Do not modify earmuffs in any way, and especially do not stretch or abuse the headband as this will reduce protection.

Fitting guide

3M™ E-A-R™ One Touch™ Pro Earplug Dispenser

Conveniently provide hearing protection where employees need it. The 3M™ One Touch™ Pro Earplug Dispenser dispenses one earplug at a time with a simple twist. No more expense and waste of individually wrapped plugs. Made from ABS plastic with a powder-coated steel-back plate, it's designed for challenging environments - indoors and outdoors.

- ▶ Accurately dispenses one earplug at a time
- ▶ Dispenses earplug directly into hand
- ▶ Powder coated steel back plate and durable ABS and POM plastic for tough environments
- ▶ Free-standing or wall-mounted, could be located inside or outside
- ▶ Mounting holes designed to fit a variety of competitive dispensers
- ▶ The innovative design protects against sun, rain and wind, when dispensing earplugs outside

3M™ PELTOR™ Optime™ II Earmuffs

3M™ PELTOR™ Optime™ II Earmuffs are our innovative hearing protectors for use in loud, demanding environments including airports and construction sites, reducing noise levels up to 31 dB. These earmuffs feature soft foam cushions, ventilation channels in the sealing rings and spacious cups, providing agreeable comfort even in long-term use and improving incidence of wear and compliance.

- Reducing noise levels from 30-31 dB, model dependant, tested to EN 352:2020
- Compatible with the 3M™ E-A-Rfit™ Dual-Ear Validation System
- Large space inside the cups helps minimise heat and moisture build-up

Hearing Protection

Hearing Protection Fit Testing

Focus

3M™ E-A-Rfit™ Dual-Ear Validation System

3M™ E-A-Rfit™ Dual-Ear Validation System helps determine whether workers are receiving adequate protection from their hearing protector by measuring across 7 standard frequencies in under five seconds, providing a detailed report on the noise attenuation performance of earplugs or earmuffs and a pass or fail rating for each individual person based on the employee's personal attenuation rating.

- Dual-element, dual-microphone assembly is the key to the system, measuring sound levels inside and outside the hearing protector
- Science-based, quantitative testing gives accurate reports of hearing protection
- Optional Cloud enables stored centralized data, multiple fit testing systems operating simultaneously across sites, and access restricted to authorized users

Protective Communications

3M™ PELTOR™ Communication Solutions

The Sound Solution

First-class communication and hearing protection! There was a time when wearing hearing protectors meant being isolated and out of contact. Those days are over. Today, 3M™ PELTOR™ offers first-class communication solutions that not only make your working day safer and more efficient, but also much nicer!

3M™ PELTOR™ products are developed for all environments where high safety must be combined with communication. Industrial environments, construction sites, agriculture and forestry are a few examples. We have developed several models to ensure there's a 3M™ PELTOR™ Headset for every situation. Headband models for all-round use, and models with helmet attachments for people who wear safety helmets at work. To ensure easy use of our products and good functions for all environments we use advance technology such as Level Dependent technology and Bluetooth®.

This pricelist mainly focuses on general industry communication solutions, but 3M also offers specialised products for e.g. military or hunting and shooting. Please contact your local 3M representative if you want to learn more about these industries and products.

Oil and gas

Mining

Hunting and sport shooting

Airport ground handling

3M™ PELTOR™

WS™ ALERT™ Features

In low noise, the ambient/environmental microphones can increase your ability to communicate with nearby colleagues and hear warning signals, approaching vehicles and other machine sounds or processes when needed.

WS™ ALERT™ X

Large buttons and voice-guided menus

No need to remove the headset for any adjustments. Voice confirmation after setting adjustments, including “low battery” voice alert.

Push-to-Listen function

You can pause streaming quickly and turn on the environmental listening with a double press.

Ambient Listening Microphones

In low noise, ambient microphones help you hear oncoming vehicles, alerts, and other warning signals when needed and when it's loud helps provide hearing protection.

Stainless steel

The headset features long-lasting, stainless steel wire bands that can help provide consistent wear experience.

Bluetooth®

Bluetooth® technology for connection to one external device for hands-free talk and streaming. Simultaneous, seamless connection to Bluetooth® devices allows for flexibility and mobility.

Approved Hearing Protection (EN 352-2020)

Protective Communications

3M™ PELTOR™ ProTac™ III Headsets

3M™ PELTOR™ ProTac™ III Headset with level-dependent function for ambient listening helps you focus on your work and communicate with colleagues in noisy environments, without removing the hearing protection. Stereo feedback will allow you to hear and better determine direction of alarms, warning cries, backing vehicles and so on. Headset unit has a rugged design with dual shells. The electronics are protected from moisture and sweat, from both the inside and the outside. Smart technology, practical design and user friendly functions will help you weather rough days in the field.

- Hearing protector helps protect against harmful noise, whilst allowing ambient sounds to be heard
- Built-in level-dependent function allows the wearer to hear ambient sounds, such as conversations, machine sounds and warning signals
- 3.5 mm stereo jack to connect to your mobile phone or two-way radio to hear the call right in your ear

**3M™ SecureFit™ Safety Helmet
X5000 and X5500 Series**

**Comfort
without
compromise.**

When you work at height or on the ground, it's just another day on the job – and we've got a safety helmet to meet the demands of it.

And when it comes to safety, 3M believes the bar can never be high enough. That's why we're proud to introduce the 3M™ SecureFit™ Safety Helmet.

Safety Helmets

Focus

3M™ SecureFit™ Safety Helmet X5000 Series

3M™ SecureFit™ Safety Helmet, X5000 Series, provides secure, comfortable and adjustable head protection for workers in a variety of situations. Our helmets feature six different settings to adjust positions and 4-point chin strap selector systems to switch between EN397 (industrial safety helmets) or EN12492 (helmets for mountaineers) certification standards. X5000 Series safety helmets are vented, brimless and have 3M™ UVi-cator™ Sensors that indicate levels of exposure to damaging ultraviolet (UV) light. They have easily-adjustable, 6-point ratchet suspension systems which feature the exclusive 3M™ Pressure Diffusion Technology. They're available in a variety of colours with reflective options available.

- Secure, comfortable head protection for working at heights and other hazardous industrial jobs
- Suspension system incorporates exclusive patented 3M™ Pressure Diffusion Technology
- 4-point chin strap selector system unique to 3M makes it possible to switch between EN 12492 (Mountaineering helmets) and EN 397 (Industrial safety helmets) standards

Head & Face Protection

3M™ SecureFit™ Safety Helmet X5500 Series

3M™ SecureFit™ Safety Helmet X5500 Series provides secure, comfortable and adjustable head protection for workers in a variety of situations. Our helmets feature adjustable positioning and easy-turning, 4-point ratchet suspension systems that features the exclusive 3M™ Pressure Diffusion Technology. X5500 Series safety helmets have 3M™ UVicator™ Sensors that indicates damaging levels of ultraviolet (UV) light. They meet the EN397 standard for general industrial use and are available in a variety of colours with or without vents.

- Secure, comfortable head protection against small falling objects and for general industrial use
- Suspension system incorporates exclusive patented 3M™ Pressure Diffusion Technology
- 4-point ratchet suspension allows wearer to customise height and fit with multiple levels of vertical adjustment

Head & Face Protection

Focus

3M™ Hard Hat G3000 Series

3M™ Series G3000 hard hat has been designed in close collaboration with industrial and forestry workers. It is intended for use in harsh environments with tough demands for effective protection, excellent ventilation and a maximum field of vision. The slim design means that falling objects slide off easily and do not dislodge the helmet from its position. Softly rounded design, without any sharp or protruding components, the extremely comfortable lining and the simple adjustment of fit makes the G3000 unique.

- Hard hat designed for use in harsh environments, with excellent ventilation and a good field of vision
- 3M™ Uvicator™ sensor disc tells you when your hard hat has been over exposed to UV-radiation and it's time to replace it
- Softly rounded design helps avoid parts snagging on cables or branches

Head & Face Protection

3M™ Hard Hat H700 Series

3M™ Hard Hats Series H700 is our series of lightweight hard hats with plastic sweatbands and ventilated headbands for improved comfort. They feature a short peak and a head harness that can be rotated 180° for improved visibility. They're available with pinlock or ratchet suspension.

- Comfortable, tough and lightweight protective hard hats
- Short peak gives improved upwards visibility
- Head harness can be rotated 180° for better visibility when working in confined spaces

Head & Face Protection

3M™ G3501 Series High Heat Safety Helmets

Temperature extremes, metal sparks and splashes – that’s the job. And it’s a tough environment to work in. 3M™ G3501 Series High Heat Safety Helmet is designed to offer high levels of protection for the toughest of applications. The helmet is also the platform for a range of hearing, eye and face protection products that are designed to withstand the metal working environments without compromising compatibility, comfort or easy of use. Available in six colours, with ratchet suspension.

- Lightweight high heat safety helmet compatible with 3M eye, face and hearing protection
- Leather sweatband for improved comfort
- Head harness can be rotated 180° for better visibility when working in confined spaces

Welding Safety

Helping to improve performance and life of the welder

Like all proud craftsmen welders tend to strive for excellence. So we believe they deserve great equipment that not only keeps them safe but also helps to enhance their performance and helps keep them comfortable during their entire workday. That's why we designed our Generation 5 (G5) of welding helmets with:

Welder safety and productivity as the key priority

A wide range of accessories allowing configuration flexibility

Consumables that are common between helmets simplifying service, forecasting and inventory

High precision TIG welding situations where clear visibility and a wide field of view is essential.

General welding situations at mid- to low-amperage across a range of materials.

When welding and grinding needs to happen in a variety of situations, locations and conditions.

Heavy industry welding situations involving high amperage and extensive grinding.

No two welders are the same

With nearly 50 years of close collaboration with welders and field-testing by professionals, we've learned that no two welders are the same – each has unique needs and preferences.

Every welding helmet we design is built around four key factors:

Together, these ensure you get the performance and productivity you need, with features you actually want to wear.

Each welding helmet in the G5 series is tailored to specific needs yet built on a shared platform, offering flexibility to suit various preferences while simplifying logistics and inventory.

Great flexibility through a wide range of accessories

One major advantage of the G5 series is its modular design. A range of accessories allowing customisation of your equipment for optimal performance, comfort, and protection.

Multiple welding filter-choices

For greater versatility 3M™ Speedglas™ offers a range of auto-darkening welding filters and passive welding filter options, designed to fit all flat-filter helmets in the series. This ensures welders can choose the best solution for their specific needs.

A range of accessories

The helmet-mounted task light may help welders stay productive in poorly lit areas. For those who require additional protection there is both a range of extended coverage options and safety helmet adaptors that allow you to attach your welding helmet to selected 3M safety helmets.

Head protection

When less can do more

The key benefit of a modular system is that you need fewer products to meet the same demands. One welding helmet or welding filter can be used for multiple applications, reducing the need for extra equipment. This not only lowers costs it also helps to reduce inventory as well as the environmental impact. Here are two ways modularity can work for you:

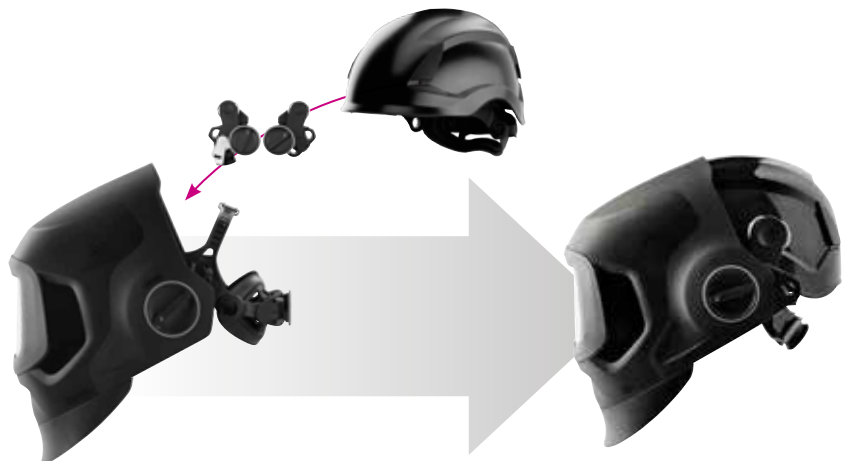

Move your favourite welding filter between helmets

Do you sometimes need to use an air system but at other times prefer a lighter smaller welding helmet¹⁾ (with alternative respiratory protection). You can still use your favourite G5-01/03 welding filter for both welding helmets.

Upgrade your welding helmet to a higher safety standard

Do your safety requirements change depending on the area you currently work in? With these adaptors you can easily rebuild your welding helmet²⁾ to fit a range of 3M safety helmets to fit your need for head protection.

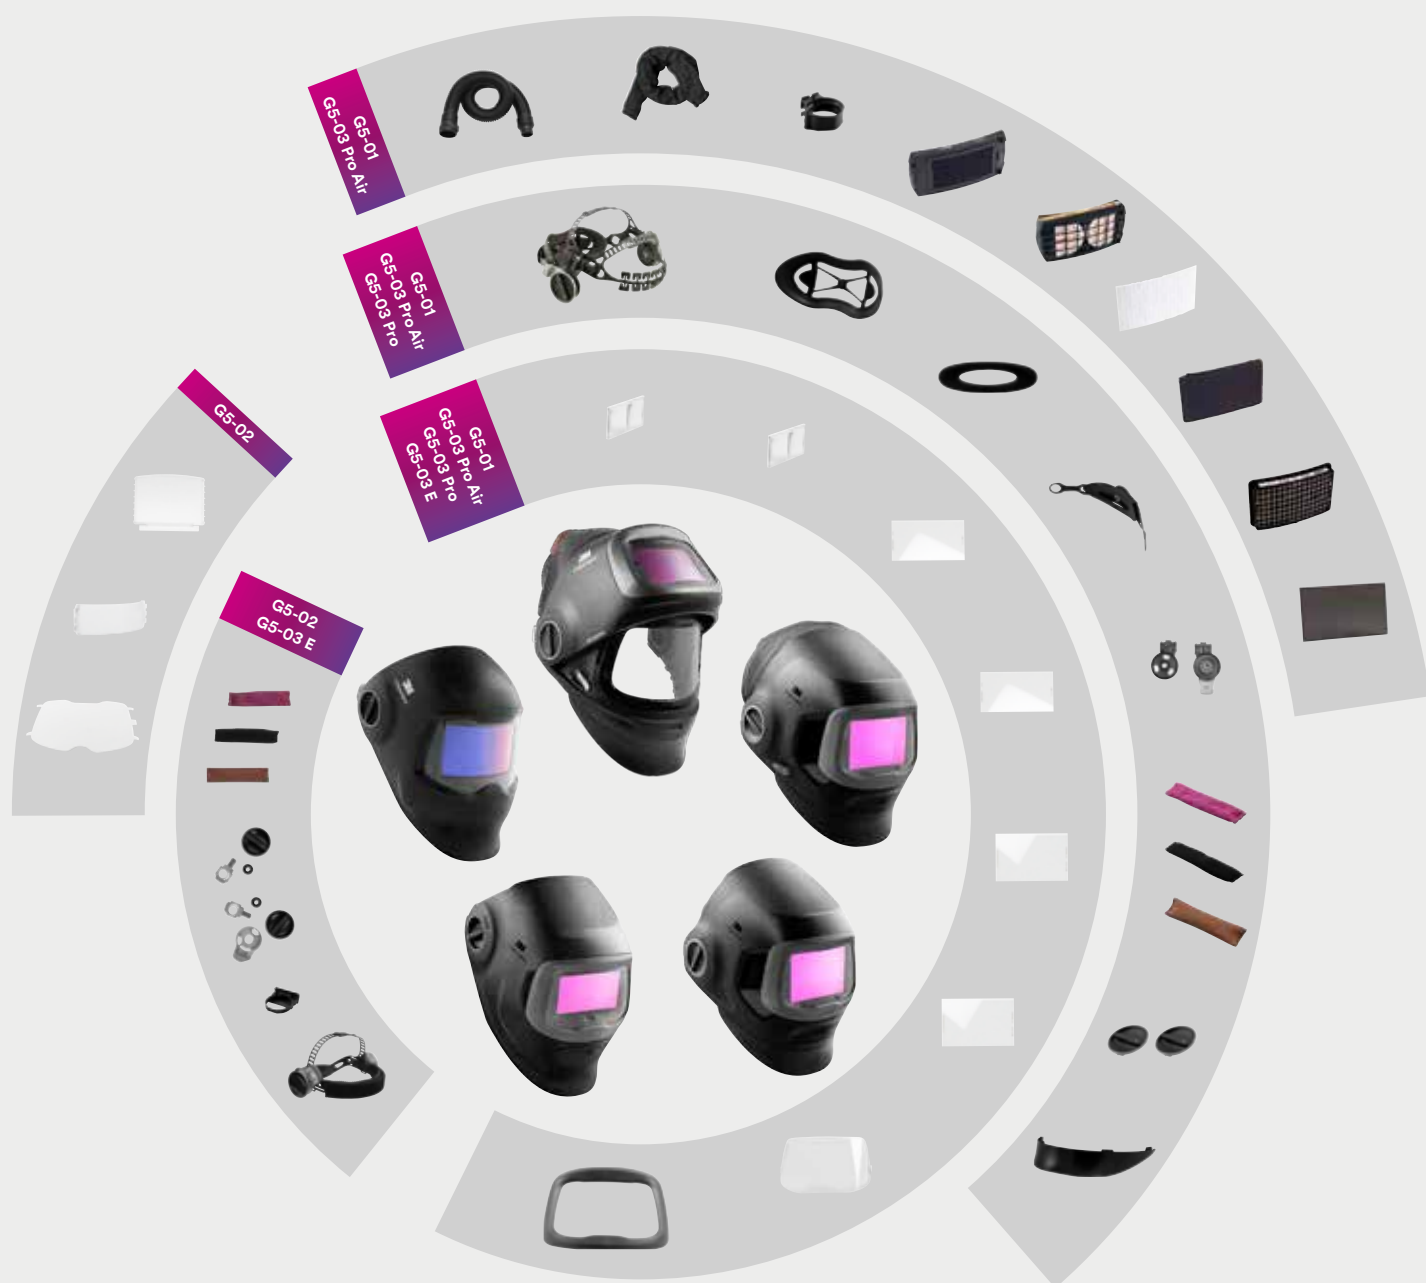

1) When not using an air system it is recommended to use alternative respiratory protection.

2) G5-03 Pro only

Common parts for efficiency and ease

The modular design of the 3M Speedglas Generation 5 series offers a major benefit – many spare parts and accessories are compatible across all G5 helmets. This means less inventory for a workshop using multiple systems.

Welding Safety

Welding Helmets

Focus

3M™ Speedglas™ Heavy-Duty Welding Helmet G5-01

3M™ Speedglas™ Heavy Duty Welding Helmet, G5-01 is specifically designed for the heavy duty welder. The helmets flip up functionality allows you to seamlessly switch between welding and grinding tasks while maintaining powered air respiratory protection.

- Available 3M™ Speedglas™ Welding Lens G5-01TW offers variable dark shades 5, 8-13 and tack welding comfort mode and G5-01VC offers variable dark shades 5, 8-14 plus Variable Color Technology
- The big (104 x 170 mm), clear protective visor is curved, with excellent views up, down and peripherally
- For more control over your comfort, the innovative G5-01 helmet airflow optimization system lets you direct the airflow to either your face, visor or somewhere in-between
- The slim profile and ergonomic design makes the G5-01 helmet easier to utilize in tight welding spaces
- Suitable for most types of arc welding

3M™ Speedglas™ Welding Helmet G5-02

3M™ Speedglas™ Welding Helmet G5-02 with curved glass Auto-Darkening Lens. Thanks to the improved optics, the 3M™ Speedglas™ Curved Welding Lens G5-02 allows you to more readily recognize colors, using the 3M™ Speedglas™ Natural Color Technology.

- Our largest Auto-Darkening Lens field of view ever (150x76 mm), utilizing the 3M™ Speedglas™ Curved Glass Technology
- Bluetooth connectivity with app management
- Great clarity before, during and after welding, with our 3M™ Speedglas™ Natural Color Technology
- By selecting just the right settings for each task, you help reduce eye strain and can help improve the quality of every weld
- Highly sensitive arc detection ideal for TIG welding operations
- Delay function to set the dark-to-light opening time

3M™ Speedglas™ G5-03 E Welding Helmets

3M™ Speedglas™ G5-03 E Welding Helmet is compatible with several different welding filters in our G5-series of welding solutions. It is also possible to be used with different additional coverage options that are available. Variants of different PPE equipments can also be used together with this helmet, such as eyewear, Filtering Facepiece Respirator & Reusable Respirators.

- Robust, compact design
- Ergonomic, adjustable head suspension
- GRIND and CUT mode functionality
- Compatible with G5-01/03 Auto Darkening Welding Filters

Focus

3M™ Speedglas™ G5-03 Pro Welding Helmets

The 3M™ Speedglas™ G5-03 Pro Welding Helmet uses next-generation technology to help provide dynamic welding protection. Intuitively designed for the challenges faced on the job, this helmet setup includes a haptic function. Just tap 3 times anywhere on either side of the helmet to activate grind or cut mode. We make use of the welding technology of the future, today — equip the 3M™ Speedglas™ G5-03 Pro Welding Helmet with various accessories, such as task-light, neck cover and head cover to configure the helmet to meet your specific needs.

- Robust, compact design
- Ergonomic, adjustable head suspension
- GRIND and CUT mode functionality, when using G5-01/03 auto darkening filters
- Available in two different Auto-Darkening Lens options (VC/TW)
- Compatible with multiple accessories
- Suitable for most types of arc welding

Powered Air Systems

Focus

3M™ Adflo™ Powered Air Respirator System

For effective protection against a range of particulates and gases encountered in the welding process, use 3M™ Adflo™ Powered Air Respirator. The Adflo™ respirator connects directly with any Speedglas™ Series respiratory welding helmet and can protect users against both particles and gases depending on the filter used.

- Can protect you against particles and gases, all in one system, depending on filter used
- Nominal protection Factor up to 500 (TH3) in combination with Speedglas welding helmets
- Connects directly with any Speedglas Series respiratory welding helmet
- Gas filters sold as separate accessories (837242 or 837542)
- An odour filter (837110) can be installed to remove unpleasant smells. This filter is not needed if a gas filter is already being used

Welding Safety

Welding Filters

3M™ Speedglas™ Auto-Darkening Welding Filters 9100 Series

3M™ Speedglas™ 9100 Series Auto-Darkening Welding Filters are designed for the professional welder using 3M™ Speedglas™ Welding Helmet 9100 Series. Incorporating dark shade ranges 5, 8-13, grinding, and cutting modes, these filters are ideal for use with most arc welding processes.

- Auto-darkening welding filter designed for use with 3M™ Speedglas™ Welding Helmet 9100 Series, suitable for most types of arc welding
- Delivers minimal distortion across the entire filter viewing area
- The sensitivity of arc detection can be adjusted for unsurpassed switching reliability. Switching time (light-dark) of 0.1ms.

Fall Protection

At 3M Fall Protection our mission is to bring every worker at height home safely.

Every day on your job, you climb to new heights with two things in mind: getting your work done well and returning home safely to those you love. Our job? Helping you get there. With our two brands, DBI-SALA® and Protecta®, we offer solutions for all your work at height needs.

ABCs of Fall Protection.

A typical Personal Fall Protection System (PFPS) incorporates key components often described as the ABCs of Fall Protection.

The (A) anchorage/anchorage connector, (B) body support and (C) connecting device - when used together - form a complete system for maximum worker protection. But don't forget the other important components of a comprehensive fall protection programme: (D) descent and rescue, (E) education and (F) fall protection for tools.

A

Anchorage

Anchorage is a secure point of attachment. Anchorage connectors vary by industry, job, type of installation and structure. They must be able to hold fast under the load of a fall, working in suspension or a rescue.

B

Body support

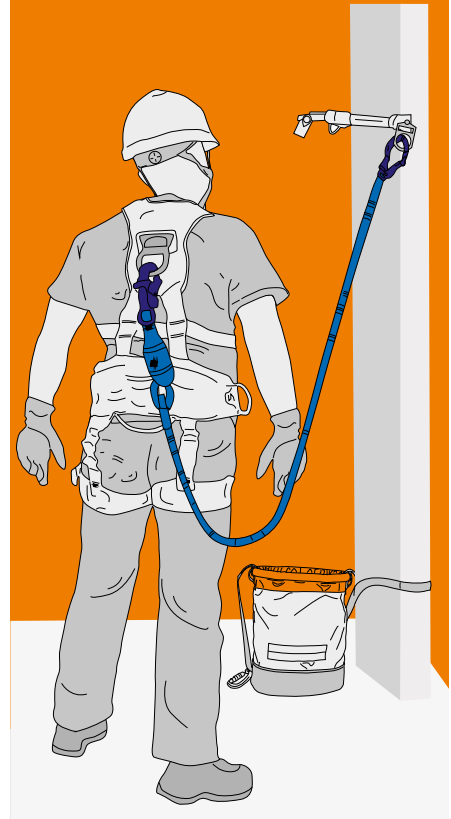

Harnesses distribute fall forces over the upper thighs, pelvis, chest and shoulders. They provide a connection point on the worker for the personal fall protection system.

C

Connecting devices

Products such as shock absorbing lanyards or self-retracting lifelines connect a worker's harness to the anchorage.

Learn more about 3M Fall Protection

Download the core product range catalogue

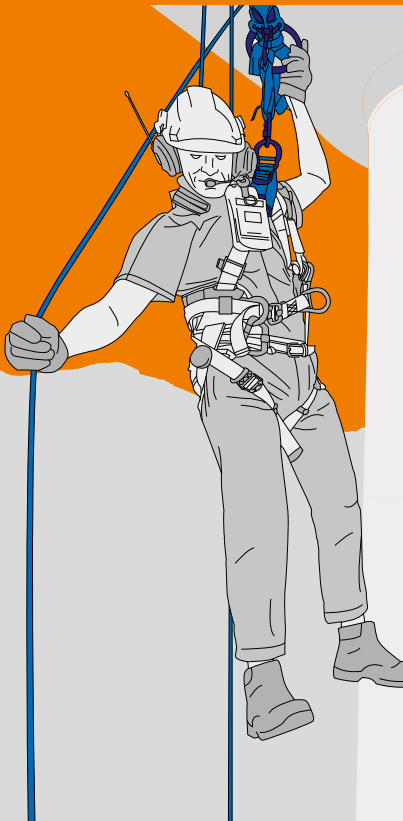

Watch webinar: How to build an effective Fall Protection Plan

D

Descent and rescue

Descent and rescue devices are used to raise or lower a fallen or injured worker to safety or retrieve him from a confined space.

E

Education

We offer a variety of best-in-class certified training courses for work at height and confined spaces at our state-of-the-art training centres located around the world.

F

Fall protection for tools

Fall protection for tools helps make work environments safer and more productive by reducing dropped object incidents.

Fall Protection

Anchorage

3M™ Protecta® Sling Anchors

3M™ Protecta® Nylon Webbing and Galvanized Steel Sling Anchors.

- Portable and reusable
- Compact and lightweight design
- Recommended for use in the construction, general industrial, mining, oil and gas, transportation, utilities, and wind energy industries

Product ID	Part Number	Product Name	MOQ	OU
7100231205	AM450/60	3M™ Protecta® Nylon Webbing Sling, Blue, 0.6 m, AM450/60	1	Each
7100231202	AM450/100	3M™ Protecta® Nylon Webbing Sling, Red, 1 m, AM450/100	1	Each
7100231206	AM450/80	3M™ Protecta® Sling Polyester Webbing, 80 cm, AM450/80	1	Each

3M™ DBI-SALA® Fixed Beam Anchors

3M™ DBI-SALA® Fixed Beam Anchor fits variable width I-beams. It is built to allow most of connection types for anchoring self-retracting lifelines on horizontal or vertical I-beams. It's engineered to glide easily, provide ease of use, and deliver exceptional safety and performance for your fall protection system.

- Compatible with various fall protection systems
- Compact, lightweight design
- Ideal for use with personal fall arrest systems with self-retracting lifelines

Product ID	Part Number	Product Name	MOQ	OU
7100230828	2108412	3M™ DBI-SALA® Fixed Beam Anchor, Fits 6.3 - 30.48 cm Wide, 3.81 cm Thick, 2108412	1	Each

3M™ DBI-SALA® Sliding Beam Anchors

The 3M™ DBI-SALA® Sliding Beam Anchor. This system provides a high-strength anchorage point that follows you while you work. Once you secure it to the beam using the integrated adjustment buttons, simply connect your Self-Retracting Lifeline (SRL) or lanyard to the rotating D-ring and you're ready to work.

- Compatible with various fall protection systems
- Compact, lightweight design
- Ideal for use with personal fall arrest systems with self-retracting lifelines

Product ID	Part Number	Product Name	MOQ	OU
7100243117	2104710	3M™ DBI-SALA® Sliding Beam Anchor, Fits 3.5 - 14 in Wide, 1.25 in Thick, 2104710	1	Each

Fall Protection

Carabiners

3M™ Protecta® Screw Gate Carabiners

The screw gate is ideal in working situations where opening is occasional during the working day, as the gate can be opened by the action of pushing it onto the anchorage point, the gate can then be manually locked once the carabiner holds the weight of the device.

- User friendly compact design
- Variable width gate opening steel or aluminum carabiner
- Versatility of attachment to fall protection systems

Product ID	Part Number	Product Name	MOQ	OU
7100324729	AJ501	3M™ Protecta® Screw Gate Carabiner, Zinc Plated Steel, 17 mm Gate, AJ501	1	Each

3M™ Protecta® Self-Locking Carabiners

The automatic gate closing and locking feature makes it an ideal choice when the user will open and close the connector many times during the work period. Quick and easy to open with one hand.

- User friendly compact design
- Variable width gate opening steel or aluminium carabiner
- Versatility of attachment to fall protection systems

Product ID	Part Number	Product Name	MOQ	OU
7100220238	AJ593	3M™ Protecta® Self Locking Carabiner with Captive Eye, AJ593	1	Each

Fall Protection

Self-retracting Lifelines

Focus

3M™ DBI-SALA® Nano-Lok™ Self-Retracting Lifelines

3M™ DBI-SALA® Nano-Lok™ Self-Retracting Lifeline is lightweight with a compact design which is easily worn on the user's back. It is designed to keep out of the way and can also be used as a lanyard replacement. Compatible with shoulder and foot level connections and available in multiple configurations, 3M™ DBI-SALA® Nano-Lok™ Self-Retracting Lifeline offers versatility for many different industrial applications.

- Extremely compact and lightweight single-leg personal self-retracting lifeline designed for working at height
- Smart activating brake system provides fall clearance as low as 1.5 m (5 ft.) - up to 4.9 m (16.1 ft.) less than lanyards
- Lightweight speed connect system reduces connect and disconnect time

3M™ DBI-SALA® Nano-Lok™ Self-Retracting Lifelines with Anchor Hooks

3M™ DBI-SALA® Nano-Lok™ Self-Retracting Lifeline (SRL) with Anchor Hook is designed for ease of use and is ideal for direct connection to most harnesses. The SRL's extremely compact and lightweight design is virtually unnoticeable on one's back, staying out of the worker's way and making it ideal as a lanyard replacement. Focusing on strengthening the worker's comfort and safety as the highest priorities, 3M™ DBI-SALA® Nano-Lok™ Personal Self-Retracting Lifeline with Anchor Hook combines lightweight design with industrial-strength durability and function.

- Swiveling anchorage loop with carabiner
- Quick activating speed sensing brake system
- Extremely compact, lightweight design

Product ID	Part Number	Product Name	MOQ	OU
7012608830	3101617	3M™ DBI-SALA® Nano-Lok™ XL Extended Length Self Retracting Lifeline with Anchor Hook, Web, 3.4 m, 3101617	1	Each

Fall Protection

3M™ DBI-SALA® Nano-Lok™ Edge Self-Retracting Lifelines

3M™ DBI-SALA® Nano-Lok™ Edge Self-Retracting Lifeline (SRL) is designed for foot-level tie-off and leading edge applications - often found in construction. The SRL is ergonomically designed for ease of use and is ideal for direct connection to most harnesses.

- Designed for foot-level tie-off and leading edge applications
- Extremely compact, lightweight design
- Quick activating speed sensing brake system

3M™ DBI-SALA® Nano-Lok™ Extended Length Self Retracting Lifelines

3M™ DBI-SALA® Nano-Lok™ Extended Length Self-Retracting Lifelines are going to great lengths to help improve fall protection. Available in 3 m and 6 m lengths, the family of Nano-Lok SRLs combines fall protection with ease-of-use and comfort for even more applications. Speed sensing brake activation system provides protection at low heights. Tension is always kept on the lifeline, which helps reduce dragging, snapping and trip falls. Compact and durable nitrile energy absorber.

- A pre-programmed RFID tag that makes it easier to track and manage equipment using the 3M™ Inspection and Asset Management System (system available by subscription)
- Impact-resistant housing made of tough thermoplastic housing designed to help withstand demanding worksites
- Quick activating speed sensing brake system

■ Fall Protection

3M™ Protecta® Self-Retracting Lifelines

The 3M™ Protecta® Self-Retracting Lifeline (SRL) is durable yet lightweight and built to last while providing an economical fall protection solution without compromising performance or safety. The 3M™ Protecta® Self-Retracting Lifeline is available in multiple lifeline lengths and materials featuring a design to help ensure longevity. Designed with the worker in mind, featuring a stackable housing design, with web or steel cable lifeline and a built-in swiveling anchorage point for added comfort and ease of use. Available in SRL, personal SRL, Leading Edge SRL, and Retrieval SRL configurations.

- Swiveling anchorage connector loop and carabiner
- Aluminium or thermoplastic housing design
- Compact, lightweight design

Fall Protection

Sealed Bloc range

3M™ DBI-SALA® Sealed-Blok™ Self-Retracting Lifelines

The 3M™ DBI-SALA® Sealed-Blok™ Self-Retracting Lifeline (SRL) incorporates a patented concept that helps separate components, such as the motor spring and brake, from foreign elements such as grease, moisture and dirt. In addition, it features patent-pending technology that reduces retraction speed, limiting the effects of a released lifeline on the SRL and surrounding equipment. The 3M™ DBI-SALA® Sealed-Blok™ Self-Retracting Lifeline is IP-69K rated to provide protection against ingress of dust, high temperatures, and high pressure water, for use in extreme environmental conditions. These lifelines are available in SRL, Retrieval SRL, and RSQ™ configurations.

- Critical SRL components sealed from environmental exposure
- Emergency retrieval system available on select models
- Durable construction

3M™ DBI-SALA® Davit Wall Mount Sleeve Base

3M™ DBI-SALA® Wall Mount Sleeve Davit Base is a stainless steel base for 3M™ DBI-SALA® Offset Davit Mast.

- Wall mount sleeve davit base
- Bolt or weld to vertical walls
- Highly durable stainless steel hardware

Product ID	Part Number	Product Name	MOQ	OU
7100311249	8000102	3M™ DBI-SALA® Confined Space, Wall Mount Base, High Capacity, Stainless Steel, 8000102	1	Each

Fall Protection

3M™ DBI-SALA® Confined Space Davit Arm

3M™ DBI-SALA® Davit Systems are designed for manhole and confined space entry/retrieval applications. The davit arm is constructed of lightweight materials including high-strength aluminium. The davit pivots for ease-of-rescue and has adjustment for overhead clearance restrictions. The Davit Arm adjusts to fit many standard entries. Many other portable and fixed bases are available to suit any job site need.

- Short and long reach arms/offset davit arms, lower mast and complete systems
- Integrated 22 kN (5,000 lbs) mast anchorage point
- Fall arrest rated in all davit offset mast positions

Product ID	Part Number	Product Name	MOQ	OU
7100313954	8000108	3M™ DBI-SALA® Confined Space, Long Reach Davit Assembly, High Capacity, 8000108	1	Each
