**STEP FORWARD**

# FUNCTIONAL FOOTWEAR THAT HELPS YOU STEP FORWARD

## **We push the boundaries of comfort, functionality and style**

We are pleased to introduce the new BENNON 2026 catalogue – full of ideas, innovations and products designed to support you both at work and in your leisure time. For sixteen years, we have been developing footwear that combines proven quality, functionality and modern design. Our journey began on the solid foundations of the Zlín shoemaking tradition; today, however, we go further – towards innovations that shape the future of modern work, tactical, barefoot, outdoor and casual footwear.

## **Expanding the work footwear portfolio**

Every year, we expand our product portfolio with new models that meet the requirements of both professionals and individual users. In the work footwear segment, we place strong emphasis on compliance with all necessary standards and regulations to ensure reliable performance even in the most demanding conditions. Our goal is for every pair of shoes to be not only a functional work tool, but also a modern and visually appealing part of professional equipment, providing maximum comfort and safety.

## **Tactical footwear with new energy**

The tactical footwear segment is developing at a very dynamic pace. We are expanding not only our model lines, but also the range of colour variants to meet the needs of users across different professions and activities. We combine functionality with aesthetics that appeal to an ever-growing customer base.

## **Barefoot as a vision of the future**

We see the rapidly growing barefoot footwear market as one of the greatest challenges and, at the same time, opportunities. This category is gaining increasing popularity, which is why we respond to customer demand by expanding our range with new models. Our aim is to deliver

maximum comfort, freedom of movement and natural ground contact – even during more demanding activities.

## **Workwear and casual clothing**

Our portfolio goes beyond footwear. We also offer workwear and casual clothing designed to meet the needs of professionals working in various environments. At the same time, we ensure our collection includes practical and comfortable garments that combine functionality with a modern look.

We are pleased to be your partner not only in business, but also in everyday life. We believe that our catalogue will provide you with all the essential information and inspiration to help you choose products perfectly suited to your needs and those of your customers. Visit [bennongroup.com](https://www.bennongroup.com) and discover more news and insights from the world of work and casual footwear and apparel.

Robert Kunorza  
CEO BENNON Group a. s.

A handwritten signature in black ink, appearing to read 'Robert Kunorza'.

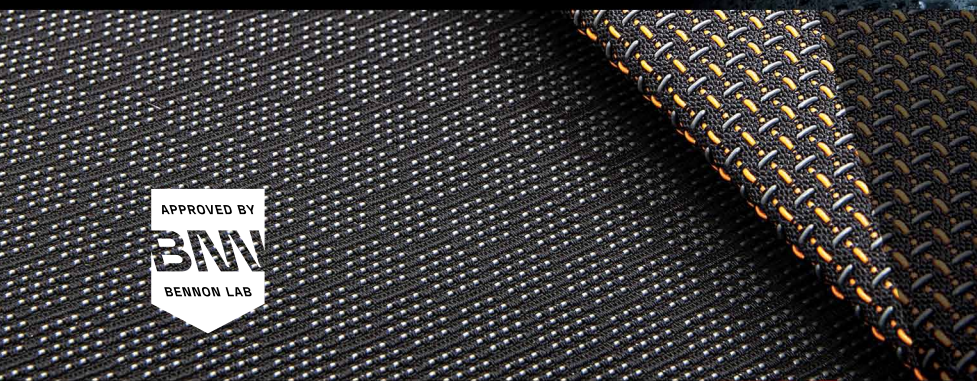

## VIBRAM®

is one of the world's leading manufacturers of premium-quality outsoles. The iconic yellow octagon has symbolised quality, innovation, design, safety and high performance value for more than 80 years. The production of Vibram® outsoles uses state-of-the-art material compounds, precisely tailored to specific user requirements while reflecting current design trends.

## CORDURA®

is an exceptionally durable technical fabric characterised by outstanding resistance to tearing and abrasion. It is used wherever high resistance to mechanical damage and long product lifespan are required. Thanks to its specific mechanical properties, CORDURA® is many times more durable than commonly used polyester materials.

## PUTEK

is a new, extremely durable material used in footwear production, combining very high abrasion resistance with exceptional lightness. In practice, this means resistance exceeding 950,000 abrasion cycles, which is many times higher than that of the best conventional fabrics, whose average abrasion resistance is around 51,000 cycles.

## VOLT-REX

is a fully reflective material that ensures excellent visibility when illuminated – both in low light and complete darkness. An additional advantage is the possibility of direct application onto the base fabric, reducing the need for sewn-on reflective elements.

## TPU components

Components made of TPU (thermoplastic polyurethane) or rubber are flexible yet highly durable and abrasion-resistant footwear elements that provide support, reinforcement and protection. In BENNON footwear, they are commonly found in the toe, heel and ankle areas, as well as forming an integral part of the outsole.

## B-SPIN

is a fast and even footwear fastening system that eliminates the need for time-consuming lacing. Simply put the shoes on and turn the knob.

## SOLE-FIX

is a special fastening system construction in the ankle area that ensures significantly improved foot stabilisation and fit. At the same time, it allows a wider range of adjustment, making the footwear suitable for different instep heights.

## ANKLE PROTECTOR

ANKLE PROTECTOR is a robust rubber component that protects the sensitive ankle area.

## REGI-TEX®

is a membrane located inside the footwear, made from a very thin PE (polyethylene) layer containing approximately 1.4 billion pores per cm<sup>2</sup>. Each membrane pore is several times smaller than a water droplet, effectively preventing water penetration. The membrane blocks external moisture while allowing internal moisture vapour to escape, maintaining a favourable microclimate inside the shoe.

## IZOLACE 3M™ Thinsulate™

is an extremely fine microfibre that effectively retains heat while allowing moisture to escape. It provides high-performance thermal insulation and ensures thermal comfort even in cold conditions.

## eCORN

is a new, innovative technology using E-TPU material with excellent mechanical and physical properties. It consists of millions of small, closed air-filled cells. The technology combines low weight, high elasticity, effective shock absorption and high energy return.

## LIFLEX

is a completely new puncture-resistant plate that protects the foot against penetration. Unlike other protective insoles, it is extremely flexible while remaining ultra-lightweight. It is made from UHMWPE fibres (ultra-high molecular weight polyethylene fibres).

# BENNON LAB

To keep pace with development and remain a full-fledged part of modern footwear manufacturing, we continuously invest in innovative technologies. For several years, we have been operating our own laboratory, enabling us to accelerate the development process and enhance quality control. We regularly invest in state-of-the-art equipment, allowing us to test materials and finished products with even greater precision.

We go beyond standard properties and norms, thereby pushing the limits of durability in footwear and apparel.

BENNON  
product  
quality  
symbol

# We test the quality of footwear and clothing

## Whole footwear flexing

Whole footwear flexing test. Walking simulation – 200,000 flex cycles ≈ approx. 150 km.

## Antistatic and ESD properties

Testing the ability of footwear and insoles to dissipate electrostatic charges.

## Dynamic waterproofness

Waterproofness test of membrane footwear by immersion in water above the outsole level for at least 80 minutes.

## Tensile strength and further tearing resistance

Testing material resistance to tearing and stretching.

## Abrasion resistance – Martindale scale

Testing material resistance to abrasion. Simulation of surface wear.

## Static waterproofness

Testing static waterproofness and construction properties by static immersion of footwear in water above the outsole level.

## Water vapour permeability

Measurement of a material's ability to transmit water vapour.

## Lighting-box

Testing fabric colours under various lighting conditions to assess colour consistency and visual durability.

## Vertical band saw

Verification of correct footwear construction and manufacturing technology.

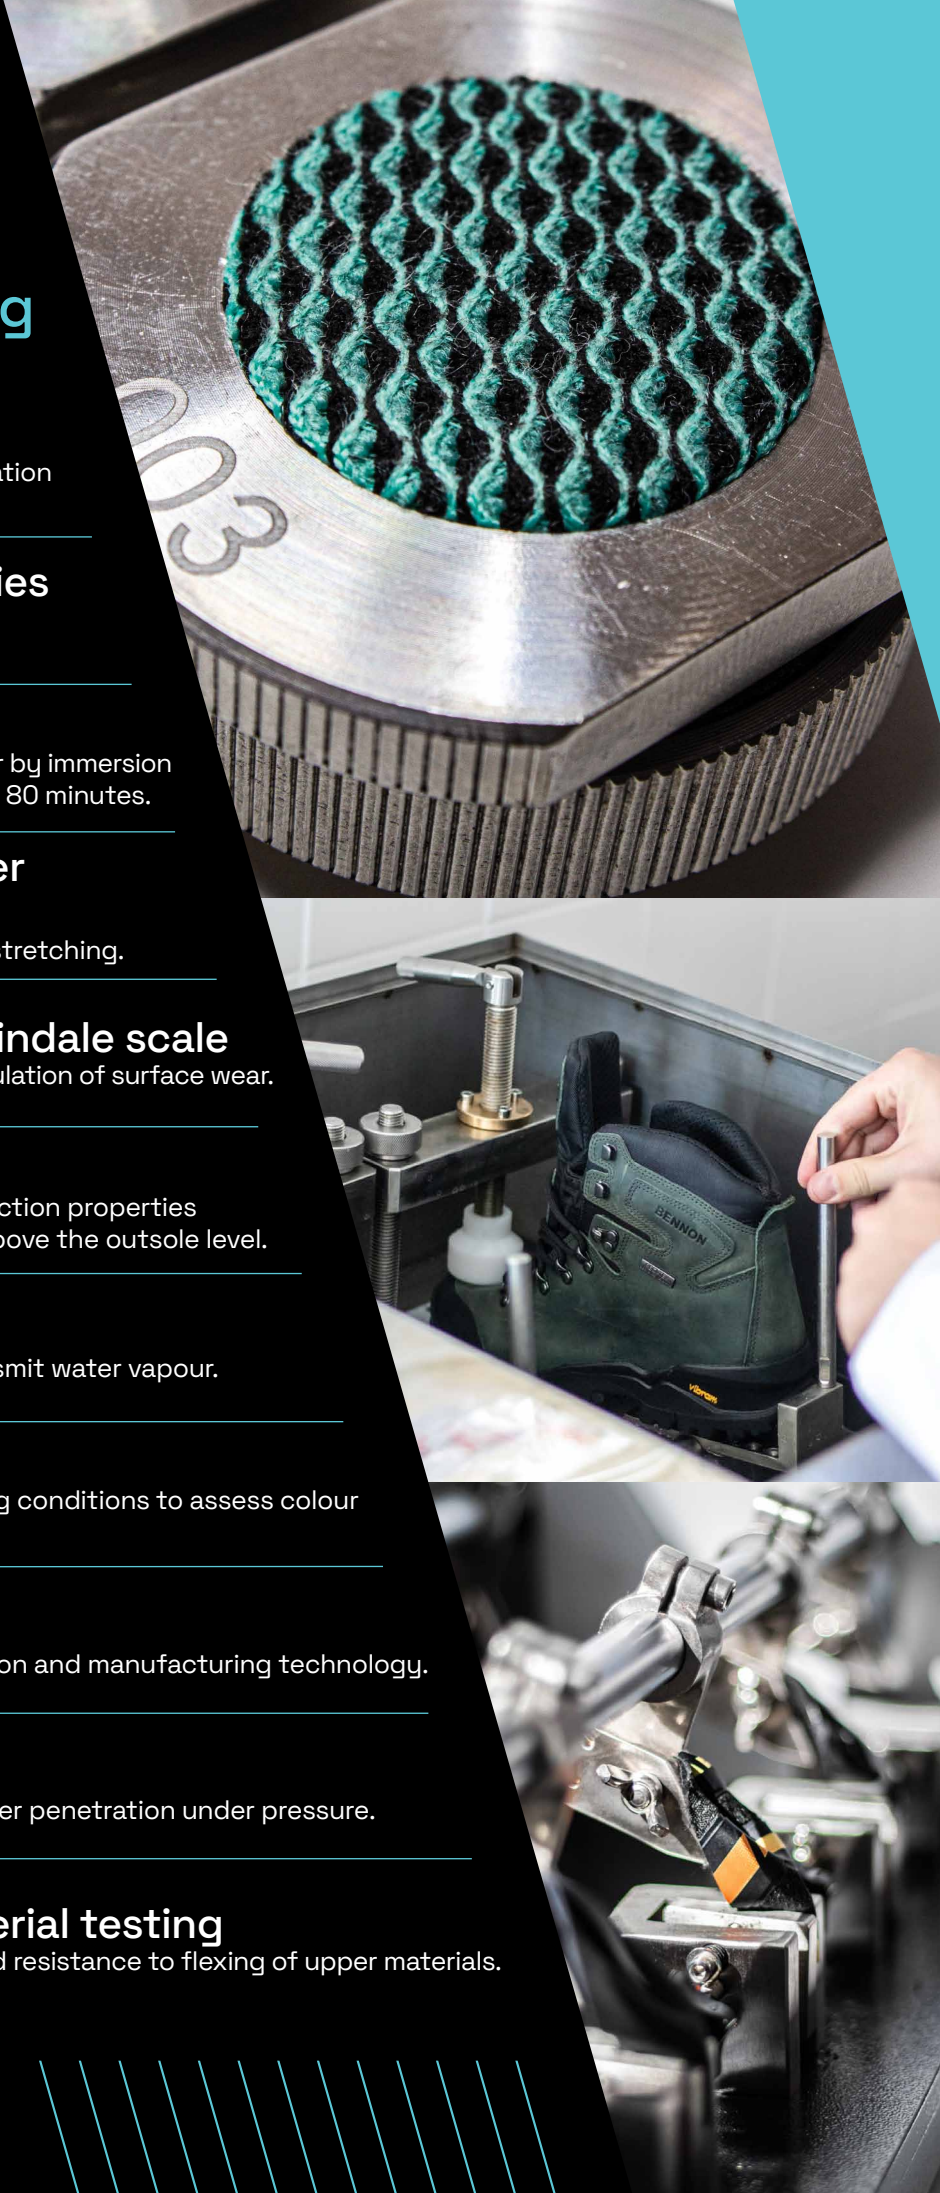

## Water column

Measurement of material resistance to water penetration under pressure.

## Flexometer – dynamic material testing

Device used to test durability, elasticity and resistance to flexing of upper materials.

Penetration resistance of the bottom of the shoe  
**PENETRATION RESISTANCE (P)**

Antistatic footwear, range 100 kΩ–1 000 MΩ  
**ANTISTATIC (A)**

Resistance of the lower part of the shoe against contact heat  
**HEAT INSULATION (HI)**

Cold resistance of the bottom of the shoe  
**COLD INSULATION (CI)**

Energy absorption in the heel area - min. 20 J  
**ENERGY ABSORPTION (E)**

Footwear resists water penetration  
**WATER RESISTANCE (WR)**

Ankle protector  
**ANKLE PROTECTOR (AN)**

Resistance to cutting  
**CUT RESISTANCE (CR)**

Anti-slip properties of footwear  
**SLIP RESISTANCE (SR)**

Resistance of the footwear upper to water penetration and absorption  
**WATER PENETRATION AND ABSORPTION (WPA)**

Outsole resistance to contact heat up to 300 °C  
**HEAT RESISTANCE (HRO)**

Outsole resistance to fuel oils  
**FUEL OIL RESISTANCE (FO)**

LG

Test for ladder work  
**LADDER GRIP (LG)**

Antistatic footwear with ESD properties  
**ELECTROSTATIC DISCHARGE**

Protective toe cap for finger protection  
**PROTECTIVE TOE CAP**

NON METALLIC

Non Metallic shoes without metal parts  
**NON METALLIC**

ULTRALIGHT

Designation for footwear that has a lower weight than the average within the given category  
**ULTRALIGHT**

Increased resistance of the footwear upper to water penetration  
**MEMBRANE**

Washability 30 °C  
**WASHABILITY**

Branded outsoles in the TACTICAL and OUTDOOR collections  
**VIBRAM**

## LIST OF PENETRATION PLATES

LIFLEX

Resistance to puncture of the footwear sole provided by LIFLEX® layer, 1,100 N. According to the test method, the footwear may be marked PL or PS.

KEVLAR

Resistance to puncture of the footwear sole provided by a Kevlar layer, 1,100 N. According to the selected test method, the footwear may be marked PL (tested with a 4.5 mm nail) or PS (tested with a 3.0 mm nail).

STEEL

Resistance to puncture of the footwear sole provided by a steel plate, 1,100 N, marked as P.

## LIST OF SLIP RESISTANT

SR

Slip resistance tested according to the new standard EN ISO 20345/20347:2022

SRA

Slip resistance tested on ceramic tile wetted with diluted soap solution

SRC

Slip resistance tested according to SRA requirements and on a smooth steel plate with glycerol

## LIST OF PROTECTIVE TOE CAPS

CARBON

Safety, non-metallic toecap for better safety of toes from carbon fibers

NANO

Safety, non-metallic toecap for better safety of toes from NANO carbon fibers

COMPOSITE

Safety, non-metallic toecap for better safety of toes from composite fibers

ALUMINIUM

Safety toecap for better safety of toes from aluminium

STEEL

Safety toecap for better safety of toes from steel

## WORK SHOES ACCORDING TO EN ISO 20347:2022

EN ISO 20347 0B	Basic requirements (e.g. specific ergonomic characteristics, slip resistance, etc.)
EN ISO 20347 01	0B + closed heel area, antistatic properties, energy absorption in the heel area
EN ISO 20347 02	01 + water penetration and absorption resistance
EN ISO 20347 03	02 + puncture resistance + outsole with tread pattern
EN ISO 20347 06	02 + water resistance
EN ISO 20347 07	03 + water resistance

## SAFETY SHOES ACCORDING TO EN ISO 20345:2022

EN ISO 20345 SB	Basic requirements (e.g. toe protection, specific ergonomic characteristics, slip resistance, etc.)
EN ISO 20345 S1	SB + closed heel area, antistatic properties, energy absorption in the heel area
EN ISO 20345 S2	S1 + resistance to water penetration and absorption
EN ISO 20345 S3	S2 + puncture resistance + outsole with tread pattern
EN ISO 20345 S7	S3 + water resistance

BREATHABLE

## BREATHABLE

Breathability is the ability of a material to permeate, wick away moisture produced by the human body.

FLEXIBILITY

## FLEXIBILITY

Flexibility is the ability of a material to adapt to your physical activities without restriction.

WATER REPELLENT

## WATER REPELLENT

It is the ability to withstand water (rain) for some time. Thus, the material does not absorb water immediately, but creates protection on the surface of the material, creating isolated drops.

WATERPROOF

## WATERPROOF

waterproof products that have a special membrane that does not let water in or under pressure.

WINDPROOF

## WINDPROOF

The ability of the material to prevent airflow from entering the body.

ABRASION RESISTANCE

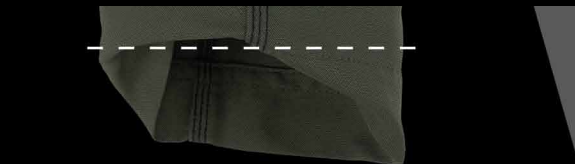

## ABRASION RESISTANCE

Abrasion resistance.

ADJUSTABLE

## ADJUSTABLE PANTS

Adjustable leg length. Possibility to extend the length of the trousers by evaporating the seam.

KNEE PADS

## KNEE PADS

Insert for knee pads. Possibility to use the insert in the area of the knees for their protection.

REFLEX

## REFLEX

The product is equipped with a reflective element that ensures visibility in the dark and dark.

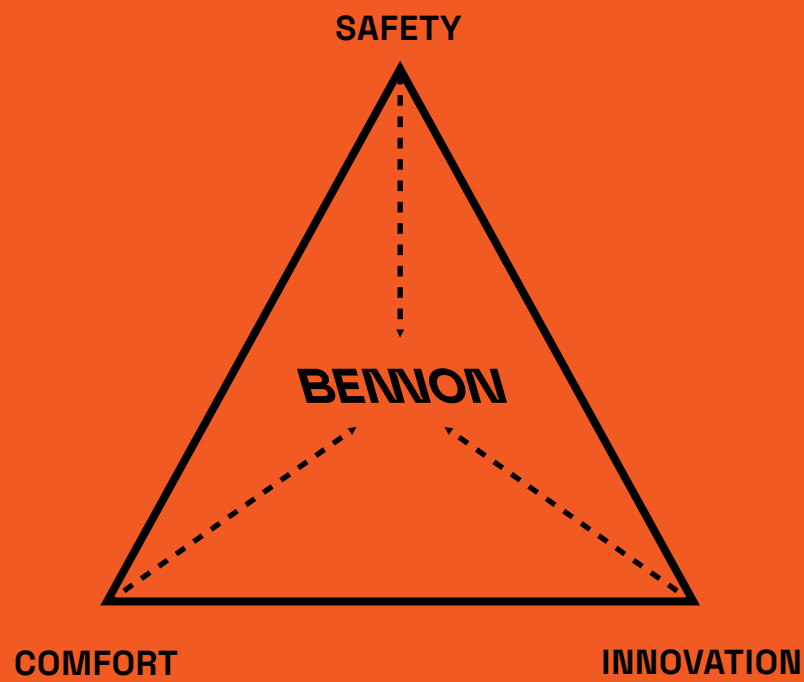

BAMBOO CHARCOAL

## BAMBOO CHARCOAL

Bamboo charcoal stands out for its fast drainage of moisture and its ability to absorb odours and keep the body warm.

CERTIFICATE

# COMFORTABLE FOOTWEAR

## Healthy footwear and quality assurance

The Comfortable Footwear quality mark has been part of the Czech Quality programme since 2016. In order for manufactured footwear to obtain this award and registered trademark, it must meet a number of strict criteria.

The trademark guarantees consumers that the product they have purchased features correct construction, ensures comfortable wear without health risks, offers high durability and long service life, provides correct size labelling, and meets a wide range of additional quality parameters.

# B-SPIN

## B-SPIN Fastening System

The modern B-SPIN system ensures fast, precise and comfortable footwear tightening using a rotary knob. By simply turning the knob clockwise, the shoe can be easily tightened and perfectly adjusted to the shape of the foot, while pulling the knob upwards instantly releases the tightening.

This system allows quick putting on and taking off without the need for time-consuming lacing, even when wearing gloves or using only one hand—an advantage especially appreciated by users working in demanding conditions. B-SPIN provides even pressure distribution across the entire instep, increasing wearing comfort and eliminating pressure points.

Thanks to its durability, precision and intuitive operation, B-SPIN is an ideal choice for everyday use wherever speed, reliability and maximum comfort are essential.

***WORKWEAR***

## EREBOS 2.0

### A NEW GENERATION OF WORKWEAR!

The EREBOS 2.0 jacket delivers a higher level of comfort, functionality and durability for everyday work. An improved cut made from stretch material, combined with hydrophobic impregnation, ensures freedom of movement and effective protection in demanding conditions. New features – inner cuffs with thumb holes, longer zippers allowing operation while wearing gloves, a larger smartphone pocket and reinforced elbow areas – enhance user comfort and extend product lifespan.

The EREBOS 2.0 trousers build on the popular previous model while offering even greater comfort and practicality. A new cut with increased room in the thigh area and an elasticated, raised waistband ensures unrestricted movement. Reinforced knees with the option to insert protective pads, metal-free pockets, an enlarged phone pocket and durable zippers confirm that every detail has been designed with maximum performance in mind.

New

## EREBOS 2.0 Jacket black/grey

CODE: 1083180020

Durable work jacket with a modern fit

- Stretch material ensures freedom of movement
- Reinforced elbows increase durability
- Inner cuffs with thumb holes – ideal for cooler conditions
- Improved access to pockets thanks to longer zippers
- Larger chest pocket – suitable even for larger smartphones
- Hydrophobic finish – protection against moisture
- Reflective elements increase safety

Main material: 88% polyester, 12% cotton, 290 g/m<sup>2</sup>

Additional material: 90% nylon, 10% elastan (Spandex), 260 g/m<sup>2</sup>

size range:  
XS-4XL

standard:  
EN ISO 13688:2014/A1:2022

New

## EREBOS 2.0 Trousers black/grey

CODE: 1084130020

Durable work trousers with a modern fit

- Improved cut with more room in the thigh area
- Stretch, raised waistband protects the lower back
- Knees reinforced with CORDURA 500D material with the option to insert knee pads
- Multifunctional pockets without metal parts
- Water-repellent finish provides protection during outdoor work
- Adjustable leg length for individual fit

Main material: 88% polyester, 12% cotton, 290 g/m<sup>2</sup>

Additional material: 90% nylon, 10% elastan (Spandex), 260 g/m<sup>2</sup>

size range:  
42-64

standard:  
EN ISO 13688:2014/A1:2022

**CORDURA**

## EREBOS Jacket black

CODE: 0271180060

### Durable work jacket

- Stretch, shrink-resistant material with water-repellent finish
- High-stress areas (shoulders, elbows, pockets) made of durable material
- Reflective piping for improved visibility
- Extended back length
- Inner sleeves with thumb holes

Main material: 91% nylon, 9% elastan (Spandex), 290 g/m<sup>2</sup>  
 Additional material: 88% polyester, 12% cotton

size range: XS-3XL  
 standard: EN ISO 13688:2013/A1:2021

## EREBOS Trousers black

CODE: 0247130060

### Durable, stretch work trousers

- Durable, robust material combined with highly stretch fabric in the seat and crotch area
- Stretch material in the back part and around the knees
- Areas exposed to the highest stress in the knee and pocket zones reinforced with CORDURA 500D material
- Practical tool pockets
- Adjustable leg length (extension option)

Main material: 88% polyester, 12% cotton, 290 g/m<sup>2</sup>  
 Additional material: 91% nylon, 9% elastan (Spandex), 260 g/m<sup>2</sup>

size range: 42-68  
 standard: EN ISO 13688:2013/A1:2021 **CORDURA**

## EREBOS Shorts black

CODE: 0248120060

### Durable, stretch work shorts

- Very durable, robust material with exceptionally stretch fabric in the seat and crotch area
- Areas exposed to the highest stress in the pocket zones reinforced with CORDURA 500D material
- Detachable tool pockets

Main material: 88% polyester, 12% cotton, 290 g/m<sup>2</sup>  
 Additional material: 91% nylon, 9% elastan (Spandex), 260 g/m<sup>2</sup>

size range: 44-64  
 standard: EN ISO 13688:2013/A1:2021

**CORDURA**

## EREBOS Jacket green/black

CODE: 0272180060

### Durable work jacket

- Stretch, shrink-resistant material with water-repellent finish
- High-stress areas (shoulders, elbows, pockets) made of durable material
- Reflective piping for improved visibility
- Extended back length
- Inner sleeves with thumb holes

Main material: 91% nylon, 9% elastan (Spandex), 290 g/m<sup>2</sup>  
 Additional material: 88% polyester, 12% cotton

size range: XS-3XL  
 standard: EN ISO 13688:2013/A1:2021

## EREBOS Trousers green/black

CODE: 0276130050

### Durable, stretch work trousers

- Durable, robust material combined with highly stretch fabric in the seat and crotch area
- Stretch material in the back part and around the knees
- Areas exposed to the highest stress in the knee and pocket zones reinforced with CORDURA 500D material
- Practical tool pockets
- Adjustable leg length (extension option)

Main material: 88% polyester, 12% cotton, 290 g/m<sup>2</sup>  
 Additional material: 91% nylon, 9% elastan (Spandex), 260 g/m<sup>2</sup>

size range: 42-68  
 standard: EN ISO 13688:2013/A1:2021

**CORDURA**

## EREBOS Shorts green/black

CODE: 0638120050

### Durable, stretch work shorts

- Very durable, robust material with exceptionally stretch fabric in the seat and crotch area
- Areas exposed to the highest stress in the pocket zones reinforced with CORDURA 500D material
- Detachable tool pockets

Main material: 88% polyester, 12% cotton, 290 g/m<sup>2</sup>  
 Additional material: 91% nylon, 9% elastan (Spandex), 260 g/m<sup>2</sup>

size range: 44-64  
 standard: EN ISO 13688:2013/A1:2021

**CORDURA**

## CAMOS Jacket black/grey

CODE: 0746180062

### Comfortable, windproof softshell jacket

- TPU membrane, waterproofness 8,000 mm
- Hydrophobic finish of the outer material
- Reinforcements made of durable CORDURA 500D material in the elbow and shoulder areas
- Reflective elements increase visibility
- Extended back length and sleeve cuffs

Main material: Softshell, 96% polyester, 4% elastan (Spandex), 340 g/m<sup>2</sup>

Additional material: 100 % polyester (fleece)

size range:

S-3XL

## CAMOS Trousers black/grey

CODE: 0747130062

### Stretch, comfortable softshell trousers

- Hydrophobic finish of the outer material
- Reinforcements made of durable CORDURA 500D material in the knee area
- Knee pad pockets increase comfort when working in a kneeling position
- High breathability and wearing comfort
- Raised waistband

Main material: Softshell, 96% polyester, 4% elastan (Spandex), 300 g/m<sup>2</sup>

Additional material: 100 % polyester (fleece)

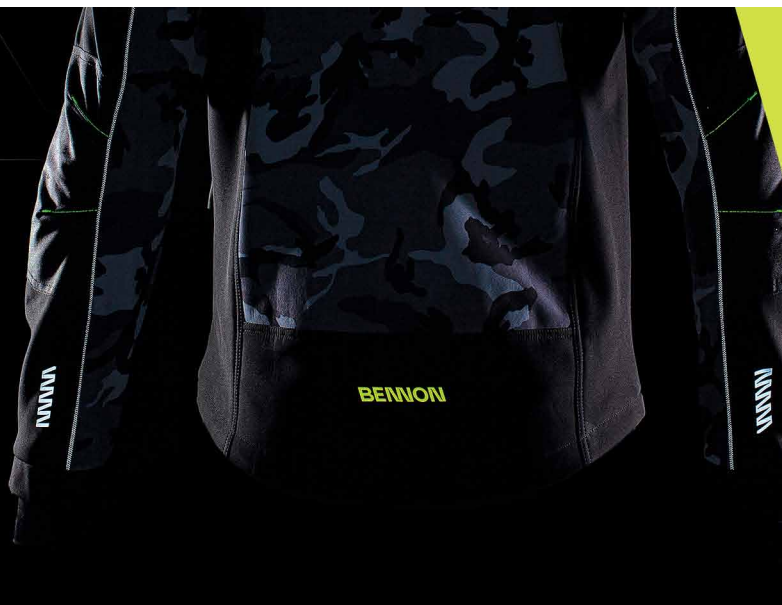

size range:

44-64

## SAFE, EVEN IN THE DARK

Reflective elements  
for better visibility

## EREBOS Trousers class 1 HI-VIS

CODE: 0943131581

### Stretch work trousers (high-visibility clothing – class 1)

- For workers not moving on public roads or railways, with traffic up to 30 km/h
- Very durable, robust material with exceptionally stretch fabric in the seat and crotch area
- The knee zone reinforced with CORDURA 500D material

Main material: 88% polyester, 12% cotton, 290 g/m<sup>2</sup>  
 Additional material: 91% nylon, 9% elastan (Spandex), 260 g/m<sup>2</sup>

size range:  
44–64

standard:  
EN ISO 13688:2013/A1:2021  
EN ISO 20471:2013/A1:2016 (class 1)

**CORDURA**

## EREBOS Trousers class 2 HI-VIS

CODE: 0944131581

### Stretch work trousers (high-visibility clothing – class 2)

- For workers moving on or near roads and railways with no traffic or traffic up to 60 km/h
- Very durable, robust material with exceptionally stretch fabric in the seat and crotch area
- Areas exposed to the highest stress in the knee zone reinforced with CORDURA 500D material

Main material: 88% polyester, 12% cotton, 290 g/m<sup>2</sup>  
 Additional material: 91% nylon, 9% elastan (Spandex), 260 g/m<sup>2</sup>

size range:  
44–64

standard:  
EN ISO 13688:2013/A1:2021  
EN ISO 20471:2013/A1:2016 (class 2)

**CORDURA**

## HERKON Trousers black

CODE: 1080130060

### Durable work trousers for everyday use

- Solid construction made of cotton fabric with elastan content ensuring freedom of movement
- Canvas construction with reinforced elements made of Oxford 600D material
- Breathable and comfortable
- Practical pockets, reinforced knees and reflective details increase safety
- Name label – ideal for work teams

Main material: 97% cotton, 3% elastan (Spandex), 270 g/m<sup>2</sup>  
 Additional material: 100% polyester (Oxford 600D)

size range:  
42–64

standard:  
EN ISO 13688:2014/A1:2022

New

## HERKON Trousers blue

CODE: 1072130090

### Durable work trousers for everyday use

- Solid construction made of cotton fabric with elasthan content ensuring freedom of movement
- Canvas construction with reinforced elements made of Oxford 600D material
- Breathable and comfortable
- Practical pockets, reinforced knees and reflective details increase safety
- Name label – ideal for work teams

Main material: 97% cotton, 3% elasthan (Spandex), 270 g/m<sup>2</sup>

Additional material: 100% polyester (Oxford 600D)

size range:

42-64

standard:

EN ISO 13688:2014/A1:2022

## HENRIX Shorts black

CODE: 1107120060

### Durable and stretch work shorts

- Elastic waistband and stretch inserts in the crotch area
- Durable CORDURA fabric in areas exposed to the highest stress
- Discreet reflective elements increase safety
- 4-way stretch material ensures freedom of movement
- Name label – ideal for work teams

Main material: 65% polyester, 32% cotton, 3% elasthan (Spandex), 270 g/m<sup>2</sup>

Additional material 1: 92% nylon, 8% elasthan (Spandex), 240 g/m<sup>2</sup>

Additional material 2: 100% CORDURA 500D

size range:

42-64

standard:

EN ISO 13688:2013/A1:2021

New

## HENRIX Shorts blue

New

## ARGON Trousers black

CODE: 1079130060

Stretch work trousers with an ideal balance of comfort, functionality and durability

- Made of stretch material ensuring freedom of movement
- Reinforced high-stress areas made of durable Oxford 300D material with protective coating
- Breathable, lightweight and comfortable even during all-day wear
- Name label – ideal for work teams

Main material: 91% nylon, 9% elastan (Spandex), 180 g/m<sup>2</sup>  
 Additional material: 100% Oxford 300D

size range: 42-64      standard: EN ISO 13688:2014/A1:2022

New

## ARGON Trousers grey/black

CODE: 1078130020

Stretch work trousers with an ideal balance of comfort, functionality and durability

- Made of stretch material ensuring freedom of movement
- Reinforced high-stress areas made of durable Oxford 300D material with protective coating
- Breathable, lightweight and comfortable even during all-day wear
- Name label – ideal for work teams

Main material: 91% nylon, 9% elastan (Spandex), 180 g/m<sup>2</sup>  
 Additional material: 100% Oxford 300D

size range: 42-64      standard: EN ISO 13688:2014/A1:2022

## ADAMOS Trousers blue

CODE: 1019130090

Lightweight men's work trousers with a simple design

- Stretch material that does not pull or restrict movement
- Option to extend the leg length
- Elastic waistband
- ID label
- 4-way stretch material used in the crotch area
- Suitable for indoor and outdoor use

Main material: 98% cotton, 2% elasthan (Spandex), 238 g/m<sup>2</sup>  
Additional material: 92% nylon, 8% elasthan (Spandex), 250 g/m<sup>2</sup>

size range:  
44-64

## ADAMOS Trousers green

CODE: 1017130050

Lightweight men's work trousers with a simple design

- Stretch material that does not pull or restrict movement
- Option to extend the leg length
- Elastic waistband
- ID label
- 4-way stretch material used in the crotch area
- Suitable for indoor and outdoor use

Main material: 98% cotton, 2% elasthan (Spandex), 238 g/m<sup>2</sup>  
Additional material: 92% nylon, 8% elasthan (Spandex), 250 g/m<sup>2</sup>

size range:  
44-64

## ICARUS Jeans blue

CODE: 0751190090

Comfortable work jeans

- Durable, breathable and highly stretch material
- Very spacious pockets for mobile phone, wallet and essential tools
- Reinforcements made of CORDURA 500D material in the knee and pocket areas
- Knee pad pockets

Main material: 77% cotton, 21% polyester,  
2% elasthan (Spandex), 340 g/m<sup>2</sup>  
Additional material: CORDURA 500D, 230 g/m<sup>2</sup>

size range:  
44-64

**CORDURA**

## MERITON Jacket black

CODE: 1062180060

### Softshell jacket for demanding conditions

- TPU membrane protects against adverse weather conditions
- Water resistance of the material 8,000 mm outside seam areas
- Excellent insulation and comfort in lower temperatures
- Underarm ventilation ensures higher comfort even during more intense movement
- Suitable for women and men, ideal for work and leisure time
- Sufficient storage space for small equipment
- Adjustable and detachable hood

Main material: 100% polyester + TPU + Sherpa fleece, 330 g/m<sup>2</sup>

size range:

XS-4XL

BREATHABLE WINDPROOF WATERPROOF

## NYX Jacket black

CODE: 0245180060

### Waterproof winter jacket

- Extended back length
- Water resistance of the material 8,000 mm outside seam areas
- Reflective elements increase visibility
- Two outer pockets and one chest pocket with zipper
- Inner phone pocket with headphone outlet
- Detachable hood

***OUTDOOR CLOTHING***

## WORK AND LEISURE CLOTHING THAT SUPPORTS YOU

Whether you are heading out for a hike, into the mountains, or working outdoors, BENNON outdoor clothing is designed to adapt to every movement and changing weather conditions. It combines functionality, comfort and durability – ideal for everyone who is constantly on the move.

The POLAROS sweatshirt is a reliable companion for cooler days. The fleece material provides warmth, breathability and stretch, ensuring you do not overheat even during more intense activity. The high stand-up collar with a short zipper protects the neck from wind, the extended back helps retain warmth, and flat seams guarantee all-day comfort. It is a sweatshirt you can rely on all year round – both at work and in your free time.

The FOBOS trousers are durable, stretch and designed to handle even demanding movements. Stretch fabric combined with triple stitching in key stress areas ensures long service life, even under intensive use. The elastic material provides full comfort and does not restrict movement, even during physically demanding activities. Practical pockets keep everything you need close at hand.

## FORCE Jacket black/red

## **KNITTER – LIGHTNESS, COMFORT AND CONFIDENCE IN EVERY STEP**

The modern KNITTER 01 ESD work shoes combine style, comfort and safety in a single model. Thanks to the upper made of high-quality material, the footwear is exceptionally lightweight and breathable, ensuring all-day comfort in dry, indoor working environments.

The footwear features ESD properties that prevent the build-up of electrostatic charges, making it ideal for use in EPA zones where antistatic protection is required. The Zephyra PU/PU outsole provides excellent grip and meets SR slip-resistance requirements, ensuring stability and safety on any surface.

KNITTER – lightweight, breathable and reliable footwear that gives you confidence with every step.

## **ORLANDO XTR**

### **- DURABILITY YOU CAN RELY ON**

The stylish and functional ORLANDO XTR 02 NM Khaki Low work shoes are designed for demanding working conditions, combining a sporty design with high durability. The footwear is water-resistant, metal-free and, thanks to its construction, provides reliable protection even during all-day outdoor work.

The upper made of Action nubuck and extremely durable Oxford 600D fabric offers high resistance to abrasion and tearing, while reflective elements enhance visibility when working in low-light conditions and darkness.

Heel cushioning effectively absorbs shocks and reduces strain on the joints, ensuring greater comfort even during long days on the move.

The SRC slip-resistant outsole provides stability on various surfaces and is additionally resistant to contact heat as well as fuels and oils.

ORLANDO XTR – durable, stable and comfortable footwear that keeps up with you.

## **WIDEON 4WIDE MAXIMUM COMFORT FOR WIDER FEET**

The WIDEON S1PS safety shoes from the 4WIDE collection are designed specifically for users who need more space inside their footwear. The wide fit ensures a high level of comfort even during all-day wear and eliminates uncomfortable pressure. Toe protection is provided by a lightweight and durable composite toe cap, while the LIFLEX® puncture-resistant plate effectively protects the foot against penetration. The outsole made from a combination of EVA and rubber offers excellent shock absorption, high abrasion resistance and slip-resistant properties, ensuring confident footing even on smooth surfaces.

The microfibre upper, complemented by a textile MESH lining, guarantees good breathability and long service life. The model also features ESD properties, preventing the build-up of electrostatic charges, making it ideal for industrial environments.

Whether you work indoors or outdoors on hard surfaces, WIDEON safety footwear delivers safety, comfort and the extra space you need.

## **STINGER S3S ESD B-SPIN LOW COMFORT, LIGHTNESS AND SAFETY IN ONE**

Looking for work footwear that combines safety, comfort and modern design? STINGER S3S ESD B-SPIN Low delivers it all in a single model. These stylish low-cut safety shoes are an ideal choice for demanding working environments – from production halls and outdoor workplaces to EPA zones requiring ESD protection. Thanks to the innovative NANO carbon toe cap, the footwear is exceptionally lightweight without compromising on safety. The B-SPIN quick fastening system saves time – simply put the shoes on, turn the knob and get to work. A rubber toe protector and TPU heel protection increase resistance to mechanical damage, while comfortable padding around the Achilles tendon and ankle ensures all-day wearing comfort.

## ORLANDO – WHEN YOUR WORK DEMANDS RELIABLE FOOTWEAR

ORLANDO XTR S7S B-SPIN HI-VIS High is durable work footwear that combines maximum protection with a high level of wearing comfort. The innovative B-SPIN fastening system enables fast and precise adjustment without lacing – simply turn the knob to achieve a perfect fit.

Thanks to S7S certification, the footwear provides protection against water, fuels and contact heat up to 300 °C. Safety is ensured by a composite toe cap and the LIFLEX puncture-resistant aplate, while the SR slip-resistant outsole and REGI-TEX® waterproof membrane take care of stability and a proper foot microclimate throughout the day.

The cushioned heel area effectively absorbs shocks, and reflective elements enhance visibility and overall wearing comfort.

Put them on, turn the knob and work with confidence!

***CLEANSPPHERE***

## FOR THE HEROES IN WHITE

WHITE antistatic footwear combines safety, functionality and, above all, a high level of wearing comfort. We know that comfortable footwear at work is essential. Even if you spend the whole day on your feet, these shoes will not let you down. WHITE sandals are equipped with a cushioned heel area that helps reduce foot fatigue even after a long working day.

That's not all. The perforated upper supports moisture wicking, while the activated carbon insole absorbs unpleasant odours. Thanks to the Velcro fastening, the footwear is easy to put on and take off, while still fitting securely on the foot. The upper material of the sandals is easy to clean, which you will appreciate in everyday use.

We take safety very seriously, which is why the footwear is equipped with a steel toe cap that effectively protects the toes. The outsole features SRC slip-resistant properties, making the footwear suitable for use both in dry indoor environments and outdoors – for example in hospitals, laboratories and food processing facilities. White is the most common choice in these environments.

**TACTICAL**

## FOOTWEAR THAT KEEPS UP EVEN IN EXTREME CONDITIONS

PANTHER XTR 06 NM is modern tactical footwear designed for users who need reliable boots for work and leisure activities in demanding terrain. This high-cut, metal-free footwear combines outstanding durability with maximum wearing comfort.

### **Exceptionally durable materials**

The combination of split leather and highly durable CORDURA® fabric provides excellent mechanical resistance and superior protection against abrasion. The upper is additionally equipped with a waterproof REGI-TEX® membrane, which effectively protects the inside of the footwear from moisture. A reinforced toe cap protects the front of the shoe from mechanical damage and significantly extends its service life.

### **Comfort even during all-day activity**

Comfort is ensured by the ABSORBA XTR insole with activated carbon, which helps reduce unpleasant odours even during prolonged wear. Effective heel cushioning reduces foot fatigue and makes every step feel lighter—whether you are on the move for an hour or all day long.

## TERENNO 2.0 MID STABILITY AND COMFORT WITH EVERY STEP

Looking for footwear you can rely on both on mountain trails and forest walks? The TERENNO 2.0 MID leather trekking boots combine lightness, versatility and durability in one model. The mid-cut upper provides the ideal balance between comfort, freedom of movement and essential ankle support.

The upper, made from high-quality nubuck leather, is abrasion-resistant and visually appealing, while the waterproof REGI-TEX® membrane ensures a comfortable foot microclimate even in adverse weather conditions. Long-distance comfort is supported by the ABSORBA XTR insole, which effectively absorbs shocks, and the Vibram® outsole, which guarantees stability and confident grip even on rocky or slippery terrain.

TERENNO 2.0 MID is the perfect choice for anyone looking for versatile outdoor footwear that performs just as well in the mountains as it does in everyday use.

***BAREFOOT***

## **BENNON BAREFOOT SPORT NATURAL MOVEMENT FOR AN ACTIVE LIFESTYLE**

Looking for barefoot shoes that work for everyday activities and are also suitable for sports? These sport barefoot shoes are the ideal choice for active individuals who want to enjoy comfort, freedom of movement and a natural connection with the ground.

Thanks to the lightweight and breathable fabric, the shoes perform perfectly throughout an active day—whether you're heading out for a walk in the city, going to work or spending the weekend outdoors. The wide toe box provides ample space for the toes, supporting natural gait and foot movement. The flexible outsole adapts easily to the terrain, allowing better ground feel and encouraging natural strengthening of foot muscles. The comfortable fit ensures the shoes adapt well to the foot without restricting movement.

**LIFESTYLE**

## LIGHTWEIGHT FOOTWEAR FOR DEMANDING DAYS

Do you spend long hours on your feet at work or during your free time and want your feet to feel comfortable even at the end of the day? Choose Meadow – thanks to advanced materials, these shoes are ultra-lightweight, breathable and exceptionally comfortable, while remaining perfectly suited for long-term wear.

The Meadow model is ideal wherever users stay on the move for many hours and need light, airy and comfortable footwear. They are appreciated by doctors and nurses, pharmacists, logistics workers, couriers, catering staff, as well as anyone looking for lightweight, modern sneakers for the city or trips—without pressure points or chafing.

The slip-resistant outsole, made using innovative eCORN technology, features an external TPU component that limits excessive foot torsion and helps maintain better balance. The outsole is also widened in the heel area, increasing stability while walking.

An additional advantage of these shoes is that they are machine washable at 30 °C (without the use of chemical agents). The textile upper is quick-drying, so even after rain or getting wet, the footwear dries quickly and is ready for use again.
